

## Erratum

In the article “Perceptual Functions of Perirhinal Cortex in Rats: Zero-Delay Object Recognition and Simultaneous Oddity Discriminations,” by Susan J. Bartko, Boyer D. Winters, Rosemary A. Cowell, Lisa M. Saksida, and Timothy J. Bussey, which appeared on pages 2548–2559 of the March 7, 2007 issue, Figure 6 was a duplicate of Figure 3. The correct Figure 6 is printed here.

**Figure 6.** Coronal sections illustrating the extent of the largest (gray) and the smallest (black) lesions of the perirhinal cortex in experiment 4, from 3.14 to 8.72 mm posterior to bregma (Paxinos and Watson, 1997).
