Neurofilament Redistribution in Transected Nerves: Evidence for Bidirectional Transport of Neurofilaments
J.D. Glass and J.W. Griffin

Nerve Growth Factor Stimulation of GAP-43 Phosphorylation in Intact Isolated Growth Cones
K.F. Meiri and D. Burdick

Cell-Type-specific Regulation of Nerve Growth Factor (NGF) Synthesis in Non-neuronal Cells: Comparison of Schwann Cells with Other Cell Types
I. Matsuoka, M. Meyer, and H. Thoenen

Tuning of Spinal Networks to Frequency Components of Spike Trains in Individual Afferents
H.R. Koerber, A.W. Seymour, and L.M. Mendell

Modulation of Neuronal Firing Mode in Cat and Guinea Pig LGNd by Histamine: Possible Cellular Mechanisms of Histaminergic Control of Arousal
D.A. McCormick and A. Williamson

Network Modulation of a Slow Intrinsic Oscillation of Cat Thalamocortical Neurons Implicated in Sleep Delta Waves: Cortically Induced Synchronization and Brainstem Cholinergic Suppression
M. Steriade, R. Currò Dossi, and A. Nuñez

Identification and Localization of Muscarinic Acetylcholine Receptor Proteins in Brain with Subtype-specific Antibodies

Growth Cone Behavior Underlying the Development of Stereotypic Synaptic Connections in Drosophila Embryos
M.E. Halpern, A. Chiba, J. Johansen, and H. Keshishian

Inositol 1,4,5-Trisphosphate gated Channels in Cerebellum: Presence of Multiple Conductance States
J. Watras, I. Bezprozvanny, and B.E. Ehrlich

Regulation of Neuropeptide Stoichiometry in Neurosecretory Cells
S. Hekimi, J. Fischer-Lougheed, and M. O'Shea

Membrane Resealing in Cultured Rat Septal Neurons after Neurite Transection: Evidence for Enhancement by Ca2+-triggered Protease Activity and Cytoskeletal Disassembly
X.-y. Xie and J.N. Barrett

Effects of Monocular Visual Deprivation on Geniculocortical Innervation of Area 18 in Cat
M.J. Friedlander, K.A.C. Martin, and D. Wassenhove-McCarthy
Exposure to High-pH Medium Increases the Incidence and Extent of Dye Coupling between Rat Hippocampal CA1 Pyramidal Neurons in vitro

J. Church and K.G. Bairbridge

Cover picture: Double immunofluorescent labeling in culture of rod photoreceptor cell bodies and their neurites with the Rho-4D2 monoclonal antibody (yellow) and the underlying retinal glia cells with the monoclonal antibody to vimentin (green). The double labeling allowed the detection of neurites from rod photoreceptor cells and the demonstration that, regardless of the substrate and culture conditions, growth of rod processes was limited to the glial cell surfaces. See Kljavin and Reh, pp. 2985–2994.

Erratum: In the Table of Contents of the August 1991 issue, the name of the first author of "The Lurcher Cerebellar Mutant Phenotype Is Not Expressed on a staggerer Mutant Background" (The Journal of Neuroscience 11:2295–2302) was misspelled. The authors' names are correct as they appeared in the article: Anne Messer, Bonnie Eisenberg, and Julie Plummer. The publisher regrets this error.

Erratum: A correction was inadvertently omitted from "Social Status in Pairs of Male Squirrel Monkeys Determines the Behavioral Response to Central Oxytocin Administration," by James T. Winslow and Thomas R. Insel (The Journal of Neuroscience 11:2032–2038, July 1991). On page 2036, the sentence beginning in the seventh line of the second column should read "A similar recalcitrance to change has been reported for subordinate members of talapoin monkey groups (Eberhart et al., 1985)." The publisher regrets this error.

Erratum: In "Selective and Divided Attention during Visual Discriminations of Shape, Color, and Speed: Functional Anatomy by Positron Emission Tomography," by Maurizio Corbetta et al. (The Journal of Neuroscience 11:2383–2402, August 1991), in the discussion section "Attention to speed" on page 2396, the authors incorrectly listed Zeki et al. in the citations of a sentence that referred to the work of Miezin and colleagues. The paper by Zeki et al. (1991) reports separate work, in which a similar activation occurs under very similar stimulation conditions.

Persons interested in becoming members of the Society for Neuroscience should address inquiries to the Society for Neuroscience, Suite 500, 11 Dupont Circle, N.W., Washington, D.C. 20036; (202) 462-6688.

Instructions to Authors appear in the January issue only. Copies of the Instructions can be obtained by writing The Journal of Neuroscience, Department of Neurobiology, Box 3209, 101G Bryan Building, Research Drive, Duke University Medical Center, Durham, NC 27710. Submissions should be sent to Dr. Dale Purves, editor-in-chief, at the same address. Inquiries concerning manuscripts can be made directly to Lucinda Paris and Dianitia Hutcheson, managing editors, at the offices of the Journal (919-684-3084; FAX 919-684-8573; Bitnet JNS@NEURO.DUKE.EDU).
