

The Journal of Neuroscience

The Official Journal of
the Society for Neuroscience

April 1992
Volume 12 Number 4

- 1127 **Feature Article:** The Microphysiology of Peripheral Taste Organs
S.D. Roper
- 1135 Visceral Targets Specify Calcitonin Gene-related Peptide and Substance P Enrichment in Trigeminal Afferent Projections
K. Horgan and D. van der Kooy
- 1144 Synapse Formation and Preferential Distribution in the Granule Cell Layer by Regenerating Retinal Ganglion Cell Axons Guided to the Cerebellum of Adult Hamsters
T.J. Zwimpfer, A.J. Aguayo, and G.M. Bray
- 1160 Selective Activation of Ca²⁺-activated PKCs in *Aplysia* Neurons by 5-HT
W.S. Sossin and J.H. Schwartz
- 1169 Neural-Vascular Relationships in Central Retina of Macaque Monkeys (*Macaca fascicularis*)
D.M. Snodderly, R.S. Weinhaus, and J.C. Choi
- 1194 Growth and Targeting of Subplate Axons and Establishment of Major Cortical Pathways
J.A. De Carlos and D.D.M. O'Leary
- 1212 Development of Topographic Order in the Mammalian Retinocollicular Projection
D.K. Simon and D.D.M. O'Leary
- 1233 Bipolar Cells Specific for Blue Cones in the Macaque Retina
N. Kouyama and D.W. Marshak
- 1253 Asymmetric Modulation of Cytosolic cAMP Activity Induces Growth Cone Turning
A.M. Lohof, M. Quillan, Y. Dan, and M.-m. Poo
- 1262 EPSP-IPSP Interactions in Cat Visual Cortex Studied with *in vivo* Whole-Cell Patch Recording
D. Ferster and B. Jagadeesh
- 1275 Differential Localization of G-proteins G_i and G_o in the Accessory Olfactory Bulb of the Rat
H. Shinohara, T. Asano, and K. Kato
- 1280 Cellular Analogs of Visual Cortical Epigenesis. I. Plasticity of Orientation Selectivity
Y. Frégnac, D. Shulz, S. Thorpe, and E. Bienenstock
- 1301 Cellular Analogs of Visual Cortical Epigenesis. II. Plasticity of Binocular Integration
D. Shulz and Y. Frégnac

- 1319 The Morphological Basis for Binocular and ON/OFF Convergence in Tree Shrew Striate Cortex
E.C. Muly and D. Fitzpatrick
- 1335 Dual Ultrastructural Localization of Enkephalin and Tyrosine Hydroxylase Immunoreactivity in the Rat Ventral Tegmental Area: Multiple Substrates for Opiate-Dopamine Interactions
S.R. Sesack and V.M. Pickel
- 1351 Does Lineage Determine the Dopamine Phenotype in the Tadpole Hypothalamus? A Quantitative Analysis
S. Huang and S.A. Moody
- 1363 2-Chloroadenosine Potentiates the α_1 -Adrenergic Activation of Phospholipase C through a Mechanism Involving Arachidonic Acid and Glutamate in Striatal Astrocytes
M. El-Etr, P. Marin, M. Tence, J.C. Delumeau, J. Cordier, J. Glowinski, and J. Premont
- 1370 Alternatively Spliced Sodium Channel Transcripts in Brain and Muscle
K.L. Schaller, D.M. Krzemien, N.M. McKenna, and J.H. Caldwell
- 1382 Functional Classes of Cortical Projection Neurons Develop Dendritic Distinctions by Class-specific Sculpting of an Early Common Pattern
S.E. Koester and D.D.M. O'Leary
- 1394 Co-release of Acetylcholine and GABA by the Starburst Amacrine Cells
D.M. O'Malley, J.H. Sandell, and R.H. Masland
- 1409 Mesencephalic Dopaminergic Neurons in Primary Cultures Express Functional Neurotensin Receptors
A. Brouard, D. Pelaprat, C. Dana, M. Vial, A.-M. Lhiaubet, and W. Rostène
- 1416 Periodic-Pattern-selective Cells in Monkey Visual Cortex
R. von der Heydt, E. Peterhans, and M.R. Dürsteler
- 1435 Visuomotor Transformations Underlying Arm Movements toward Visual Targets: A Neural Network Model of Cerebral Cortical Operations
Y. Burnod, P. Grandguillaume, I. Otto, S. Ferraina, P.B. Johnson, and R. Caminiti
- 1454 Endogenous NGF and Nerve Impulses Regulate the Collateral Sprouting of Sensory Axons in the Skin of the Adult Rat
J. Diamond, M. Holmes, and M. Coughlin
- 1467 Sensory Nerves in Adult Rats Regenerate and Restore Sensory Function to the Skin Independently of Endogenous NGF
J. Diamond, A. Foerster, M. Holmes, and M. Coughlin
- 1477 Reliability and Effectiveness of Transmission from Exteroceptive Sensory Neurons to Spiking Local Interneurons in the Locust
M. Burrows
- 1490 Submicrovillar Tubules in Distal Segments of Squid Photoreceptors Detected by Rapid Freezing
J.P. Walrond and E.Z. Szuts
- 1502 Convergence of Reflex Pathways Excited by Distension and Mechanical Stimulation of the Mucosa onto the Same Myenteric Neurons of the Guinea Pig Small Intestine
T.K. Smith, J.C. Bornstein, and J.B. Furness

- 1511 Involvement of Ventromedial Medulla "Multimodal, Multireceptive" Neurons in Opiate Spinal Descending Control System: A Single-Unit Study of the Effect of Morphine in the Awake, Freely Moving Rat
G. Martin, J. Montagne-Clavel, and J.-L. Olivéras
- 1523 Zinc, a Neurotoxin to Cultured Neurons, Contaminates Cycad Flour Prepared by Traditional Guamanian Methods
M.W. Duncan, A.M. Marini, R. Watters, I.J. Kopin, and S.P. Markey
- 1538 Pre-Oligodendrocytes from Adult Human CNS
R.C. Armstrong, H.H. Dorn, C.V. Kufta, E. Friedman, and M.E. Dubois-Dalq
- 1548 Association of BEN Glycoprotein Expression with Climbing Fiber Axonogenesis in the Avian Cerebellum
O. Pourquié, M.E.R. Hallonet, and N.M. Le Douarin
- 1558 IGF-I and IGF-II Protect Cultured Hippocampal and Septal Neurons against Calcium-mediated Hypoglycemic Damage
B. Cheng and M.P. Mattson

Cover picture: A drawing of the complete retinal vasculature of the fovea of a macaque monkey (*Macaca fascicularis*). The center of the fovea (black dot) is avascular, but it is surrounded by an intricate capillary network connecting an alternating array of arteries and veins. The capillaries are preferentially located at specific tissue planes indicated by the color code, suggesting a close linkage between retinal metabolism and the retinal circulation. Outside the fovea, the capillary network of the retina becomes especially dense in regions with a thick nerve fiber layer. Near the optic disk, as many as 60–70% of the photons traversing the retina will encounter one or more capillaries before reaching a photoreceptor. See Snodderly et al., pp. 1169–1193.

Persons interested in becoming members of the Society for Neuroscience should address inquiries to the Society for Neuroscience, Suite 500, 11 Dupont Circle, N.W., Washington, D.C. 20036; (202) 462-6688.

Instructions to Authors appear in the January issue only. Copies of the Instructions can be obtained by writing *The Journal of Neuroscience*, Department of Neurobiology, Box 3209, 101G Bryan Building, Research Drive, Duke University Medical Center, Durham, NC 27710. Submissions should be sent to Dr. Dale Purves, editor-in-chief, at the same address. Inquiries concerning manuscripts can be made directly to Dianitia Hutcheson, managing editor, at the offices of the *Journal* (919-684-3084; FAX 919-684-8573; Bitnet JNS@NEURO.DUKE.EDU).

The Journal of Neuroscience is pleased to announce that authors now may send a disk containing an electronic file of their manuscript once the paper is provisionally accepted. See the Instructions to Authors in the January 1992 issue for detailed guidelines on acceptable disk and file formats.
