Errata:

In the article “Interleukin-1β Augments Release of Norepinephrine, Dopamine, and Serotonin in the Rat Anterior Hypothalamus,” Futoshi Shintani et al., pp. 3574–3581 in the August 1993 issue of The Journal of Neuroscience, there is an error in Figure 5. The symbols in the upper half of the figure are incorrectly labeled. The open circle should be labeled DXM + IL-1β, and the solid circle should be labeled DXM + VEHICLE. The authors regret the error.
