

# The Journal of Neuroscience

The Official Journal of  
the Society for Neuroscience

January 1, 1996  
Volume 16 Number 1

---

Articles are grouped according to the section to which they were submitted and are presented in the following sequence: Molecular, Cellular, Developmental, Systems, and Behavioral Neuroscience.

- 1 A Strongly Inwardly Rectifying K<sup>+</sup> Channel that Is Sensitive to ATP  
*Anthony Collins, Michael S. German, Yuh Nung Jan, Lily Y. Jan, and Biao Zhao*
  
- 10 Expression and Characterization of *Aplysia* Protein Kinase C: A Negative Regulatory Role for the E Region  
*Wayne S. Sossin, Xiaotang Fan, and Farzad Saberi*
  
- 19 Selective Alterations in Gene Expression for NMDA Receptor Subunits in Prefrontal Cortex of Schizophrenics  
*S. Akbarian, N. J. Sucher, D. Bradley, A. Tafazzoli, D. Trinh, W. P. Hetrick, S. G. Potkin, C. A. Sandman, W. E. Bunney, Jr., and E. G. Jones*
  
- 31 mRNA Expression of KIF1A, KIF1B, KIF2, KIF3A, KIF3B, KIF4, KIF5, and Cytoplasmic Dynein during Axonal Regeneration  
*Reiko Takemura, Takao Nakata, Yasushi Okada, Hiroto Yamazaki, Zhizeng Zhang, and Nobutaka Hirokawa*
  
- 36 Metabotropic Glutamate Receptor Modulation of Voltage-Gated Ca<sup>2+</sup> Channels Involves Multiple Receptor Subtypes in Cortical Neurons  
*Sukwoo Choi and David M. Lovinger*
  
- 46 Calcium-Independent Activation of the Secretory Apparatus by Ruthenium Red in Hippocampal Neurons: A New Tool to Assess Modulation of Presynaptic Function  
*Louis-Eric Trudeau, Robert T. Doyle, Dennis G. Emery, and Philip G. Haydon*
  
- 55 Components of Glial Responses to Exogenous and Synaptic Glutamate in Rat Hippocampal Microcultures  
*Steven Mennerick, Ann Benz, and Charles F. Zorumski*
  
- 65 11 $\beta$ -Hydroxysteroid Dehydrogenase in Cultured Hippocampal Cells Reactivates Inert 11-Dehydrocorticosterone, Potentiating Neurotoxicity  
*Vidya Rajan, Christopher R. W. Edwards, and Jonathan R. Seckl*
  
- 71 *In Vitro* Ischemia Promotes Calcium Influx and Intracellular Calcium Release in Hippocampal Astrocytes  
*Steven Duffy and Brian A. MacVicar*
  
- 82 Regulation of Intracellular Cl<sup>-</sup> Levels by Na<sup>+</sup>-Dependent Cl<sup>-</sup> Cotransport Distinguishes Depolarizing from Hyperpolarizing GABA<sub>A</sub> Receptor-Mediated Responses in Spinal Neurons  
*Jeffrey Rohrbough and Nicholas C. Spitzer*

- 92 Taurine Induces a Long-Lasting Increase of Synaptic Efficacy and Axon Excitability in the Hippocampus  
*Mario Galarreta, Julián Bustamante, Rafael Martín del Río, and José M. Solís*
- 103 The  $\alpha_6$  Subunit of the GABA<sub>A</sub> Receptor Is Concentrated in Both Inhibitory and Excitatory Synapses on Cerebellar Granule Cells  
*Zoltan Nusser, Werner Sieghart, F. Anne Stephenson, and Peter Somogyi*
- 115 Calcium-Dependent Inactivation of Calcium Current in Synaptic Terminals of Retinal Bipolar Neurons  
*Henrique von Gersdorff and Gary Matthews*
- 123 Synaptically Released Histamine Increases Dye Coupling among Vasopressinergic Neurons of the Supraoptic Nucleus: Mediation by H<sub>1</sub> Receptors and Cyclic Nucleotides  
*G. I. Hatton and Q. Z. Yang*
- 130 Rise in Intracellular Calcium via a Nongenomic Effect of Allopregnanolone in Fetal Rat Hypothalamic Neurons  
*Govindan Dayanithi and Lucia Tapia-Arancibia*
- 137 Axonal Transport and Distribution of Synaptobrevin I and II in the Rat Peripheral Nervous System  
*Jia-Yi Li, Lambert Edelmann, Reinhard Jahn, and Annica Dahlström*
- 148 Localization of L-Type Ca<sup>2+</sup> Channels at Perisynaptic Glial Cells of the Frog Neuromuscular Junction  
*Richard Robitaille, Marie-Josée Bourque, and Sylvie Vandaele*
- 159 Acid Efflux from Retinal Glial Cells Generated by Sodium Bicarbonate Cotransport  
*Eric A. Newman*
- 169 *In Vivo*, *In Vitro*, and Computational Analysis of Dendritic Calcium Currents in Thalamic Reticular Neurons  
*Alain Destexhe, Diego Contreras, Mircea Steriade, Terrence J. Sejnowski, and John R. Huguenard*
- 186 Properties of the Endosomal–Lysosomal System in the Human Central Nervous System: Disturbances Mark Most Neurons in Populations at Risk to Degenerate in Alzheimer’s Disease  
*Anne M. Cataldo, Deborah J. Hamilton, Jody L. Barnett, Peter A. Paskevich, and Ralph A. Nixon*
- 200 AMPA Receptor Activation Is Rapidly Toxic to Cortical Astrocytes when Desensitization Is Blocked  
*Jeannie C. David, Kelvin A. Yamada, Mahesh R. Bagwe, and Mark P. Goldberg*
- 210 MN20, a D2 Cyclin, Is Transiently Expressed in Selected Neural Populations during Embryogenesis  
*M. Elizabeth Ross, Michelle L. Carter, and Jang Hern Lee*
- 220 Persistent Dentate Granule Cell Hyperexcitability after Neonatal Infection with Lymphocytic Choriomeningitis Virus  
*Bradley D. Pearce, Scott C. Steffensen, Alyssa D. Paoletti, Steven J. Henriksen, and Michael J. Buchmeier*

- 229 Differential Regulation of Adrenergic Receptor Development by Sympathetic Innervation  
*Beth A. Habecker, Nell M. Malec, and Story C. Landis*
- 238 The Molecular Composition of Neuronal Microfilaments Is Spatially and Temporally Regulated  
*Ron Weinberger, Galina Schevzov, Peter Jeffrey, Kylie Gordon, Mark Hill, and Peter Gunning*
- 253 Downregulation of Cu/Zn Superoxide Dismutase Leads to Cell Death via the Nitric Oxide–Peroxynitrite Pathway  
*Carol M. Troy, Daniele Derossi, Alain Prochiantz, Lloyd A. Greene, and Michael L. Shelanski*
- 262 Sequence of Stress-Induced Alterations in Indices of Synaptic and Transcriptional Activation in Parvocellular Neurosecretory Neurons  
*K. J. Kovács and P. E. Sawchenko*
- 274 Drugs of Abuse and Stress Increase the Expression of GluR1 and NMDAR1 Glutamate Receptor Subunits in the Rat Ventral Tegmental Area: Common Adaptations among Cross-Sensitizing Agents  
*Lawrence W. Fitzgerald, Jordi Ortiz, Azita G. Hamedani, and Eric J. Nestler*
- 283 Laminar Compartmentalization of GABA<sub>A</sub>-Receptor Subtypes in the Spinal Cord: An Immunohistochemical Study  
*Stephan Bohlhalter, Oliver Weinmann, Hanns Mohler, and Jean-Marc Fritschy*
- 298 The Synaptic Drive from the Spinal Locomotor Network to Motoneurons in the Newborn Rat  
*Jean-René Cazalets, Michel Borde, and François Clarac*
- 307 A Dendritic GABA<sub>A</sub>-Mediated IPSP Regulates Facilitation of NMDA-Mediated Responses to Burst Stimulation of Afferent Fibers in Piriform Cortex  
*Evan D. Kanter, Ajay Kapur, and Lewis B. Haberly*
- 313 High-Speed Optical Imaging of Afferent Flow through Rat Olfactory Bulb Slices: Voltage-Sensitive Dye Signals Reveal Periglomerular Cell Activity  
*David M. Senseman*
- 325 The Effect of Efferent Stimulation on Basilar Membrane Displacement in the Basal Turn of the Guinea Pig Cochlea  
*Euan Murugasu and Ian J. Russell*
- 333 Medial Preoptic Area Afferents to Periaqueductal Gray Medullo-Output Neurons: A Combined Fos and Tract Tracing Study  
*Tilat A. Rizvi, Anne Z. Murphy, Matthew Ennis, Michael M. Behbehani, and Michael T. Shipley*
- 345 The Interaction of Imposed and Inherent Olfactory Mucosal Activity Patterns and their Composite Representation in a Mammalian Species Using Voltage-Sensitive Dyes  
*Paul F. Kent, Maxwell M. Mozell, Stephen J. Murphy, and David E. Hornung*
- 354 Hippocampal Ensemble Activity during Spatial Delayed-Nonmatch-to-Sample Performance in Rats  
*Sam A. Deadwyler, Terence Bunn, and Robert E. Hampson*

- 373 NMDA Receptor Antagonists Impair Prefrontal Cortex Function as Assessed via Spatial Delayed Alternation Performance in Rats: Modulation by Dopamine  
*Anita Verma and Bita Moghaddam*
- 380 Neuronal Circuitry for Comparison of Timing in the Electrosensory Lateral Line Lobe of the African Wave-Type Electric Fish *Gymnarchus niloticus*  
*Masashi Kawasaki and Yuan-Xing Guo*
- 392 Synchronization of Fast (30–40 Hz) Spontaneous Cortical Rhythms during Brain Activation  
*M. Steriade, F. Amzica, and D. Contreras*
- 418 The Selective Neuronal NO Synthase Inhibitor 7-Nitro-Indazole Blocks Both Long-Term Potentiation and Depotentiation of Field EPSPs in Rat Hippocampal CA1 *In Vivo*  
*Ciaran Doyle, Christian Hölscher, Michael J. Rowan, and Roger Anwyl*

i Instructions for Authors

**Cover picture:** Phase comparison circuit in the electrosensory lateral line lobe of an electric fish, *Gymnarchus*. A transverse section of bilateral lobes in which colored camera lucida drawings of intracellularly filled primary afferents (*blue*) and giant cells (*red* and *yellow*) are shown. Neurons sensitive to phase differences as small as a few microseconds arise at the inner cellular layer of the lobe where the afferents and giant cells, which represent phases of the different body areas, terminate. For details, see the article by Kawasaki and Guo in this issue (pp. 380–391).

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 11 Dupont Circle, NW, Suite 500, Washington, DC 20036, phone 202-462-6688.

Instructions for Authors appear at the end of the January 1, 1996 issue. Copies of the Instructions can be obtained by writing to Diane M. Sullenberger, Director of Publications, *The Journal of Neuroscience*, Society for Neuroscience, 11 Dupont Circle, NW, Suite 500, Washington, DC 20036, phone 202-462-6688, fax 202-462-1547, e-mail [jn@sfn.org](mailto:jn@sfn.org). The Instructions are also available via Internet ([//www.sfn.org/](http://www.sfn.org/)) and the Society's Gopher server (Host: [gopher.sfn.org](http://gopher.sfn.org). Port: 70.). Submissions should be sent to the above address. Scientific inquiries concerning manuscripts can be made directly to Dr. David C. Van Essen, Editor-in-Chief, *The Journal of Neuroscience*, Box 8108, Washington University School of Medicine, 660 South Euclid Avenue, St. Louis, MO 63110, phone 314-362-2721, fax 314-362-2734, e-mail [JNEUROSCI@THALAMUS.WUSTL.EDU](mailto:JNEUROSCI@THALAMUS.WUSTL.EDU).

*The Journal of Neuroscience* requests that authors send a disk containing an electronic file of their manuscript with each submission. Most word processing software can be used; see the Instructions for Authors for detailed guidelines on acceptable disk and file formats.
