Absence of Fyn and Src causes a Reeler-like inversion of cortical layers. The image shown is a montage of enhanced-color images showing parts of fyn−/−, src−/− double-mutant and wild-type fetal cortical plates, stained for Tbr1 (red), Brn1 (green), and DNA (blue). Images are oriented with the pial surface upward. Mutant and wild-type images alternate, starting with mutant in the left column. For details, see the article by Kuo et al. in this issue (pages 8578 – 8586).

Correction: In the article "Homer2 Is Necessary for EtOH-Induced Neuroplasticity," which appeared on pages 7054–7061 of the July 27, 2005 issue, the name of an author was spelled incorrectly. The seventh author’s name should have read Matthias Klugmann.

Correction: In the article "Regular Exercise Prolongs Survival in a Type 2 Spinal Muscular Atrophy Model Mouse," by Clément Grondard, Olivier Biondi, Anne-Sophie Armand, Sylvie Lécolle, Bruno Della Gaspera, Claude Pariset, Hung Li, Claude-Louis Gallien, Pierre-Paul Vidal, Christophe Chanoine, and Frédéric Charbonnier, which appeared on pages 7615–7622 of the August 17, 2005 issue, the blots corresponding to exon 5 and exon 7 have been inverted in Figure 5B,C. The correct version of Figure 5, as well as the legend, is printed in this issue.

Correction: In the article "Association/Dissociation of a Channel–Kinase Complex Underlies State-Dependent Modulation," by Neil S. Magoski and Leonard K. Kaczmarek, which appeared on pages 8037–8047 of the August 31, 2005 issue, some Greek symbols (µ) did not translate properly in Figure 7A,F. The corrected figure and its legend are printed in this issue.

Correction: In the article "Conditional Associative Memory for Musical Stimuli in Nonmusicians: Implications for Absolute Pitch," by Patrick Bermudez and Robert J. Zatorre, which appeared on pages 7718–7723 of the August 24, 2005 issue, the most recent versions of Figures 2 and 4 were not used because of a printer’s error. The correct versions of both figures, as well as each corresponding legend, are printed in this issue.

Correction: In the article "Chronic Enhancement of the Intrinsic Growth Capacity of Sensory Neurons Combined with the Degradation of Inhibitory Proteoglycans Allows Functional Regeneration of Sensory Axons through the Dorsal Root Entry Zone in the Mammalian Spinal Cord," by Michael P. Steinmetz, Kevin P. Horn, Veronica J. Tom, Jared H. Miller, Sarah A. Busch, Dileep Nair, Daniel J. Silver, and Jerry Silver, which appeared on pages 8066–8076 of the August 31, 2005 issue, the third contributor to the unpublished observations mentioned in the sixth paragraph of the Discussion is A. I. Basbaum. In addition, Figures 1 and 2 should have printed in color rather than black and white. The correct color versions of both figures, as well as each corresponding legend, are printed in this issue.
