

The Journal of Neuroscience

August 12, 2009 • Volume 29 Number 32 • www.jneurosci.org

Cover legend: Golgi-Cox-impregnated dendrite segments from hippocampal CA1 pyramidal neurons of transgenic mice overexpressing normal human presenilin 1. Segments are from the stratum radiatum layer, and processing of the sections involved counterstain with methylgreen. For more information, see the article by Auffret et al. in this issue (pages 10144–10152).
