The History of Neuroscience in Autobiography Series

Edited by Larry R. Squire

Outstanding neuroscientists tell the stories of their scientific work in this fascinating series of autobiographical essays. Within their writings, they discuss major events that shaped their discoveries and their influences, as well as people who inspired them and helped shape their careers as neuroscientists.

Autobiographical Video (Also available in DVD format)

PBS personality Richard Thomas interviews eminent senior neuroscientists, who reflect upon their lives, their dreams, and work and share their insights on what’s ahead in the field of neuroscience.

Please visit www.sfn.org/history for information on how to order the books, videos, and DVD’s.

Faculty Position: Principal Investigator, Reparative Strategies In Spinal Cord Injury

The Miami Project to Cure Paralysis/Department of Neurological Surgery at the University of Miami, Miller School of Medicine is seeking outstanding applicants at the Assistant, Associate or Full Professor levels. A significant record of academic accomplishment and the potential to attract independent research funding are important consideration for this position. The Miami Project offers excellent basic science, translational, and clinical research programs directed toward study of central nervous system damage and development of novel treatments to promote functional recovery.

The successful applicant (PhD and/or MD) will be a member of this interdisciplinary Center of Excellence with access to numerous state-of-the-art core facilities. The candidate should have a strong interest in pursuing research related to reparative strategies for spinal cord injury. Investigators using cell based therapies and biomaterials in animal models are of particular interest, but other approaches are also encouraged. Rank and salary will be commensurate with experience and record of academic accomplishment.

This is an excellent opportunity to join a productive team of basic and clinical scientists investigating spinal cord injury in a state-of-the-art research center located in a beautiful city. Start-up packages, salaries and benefits are commensurate with experience. The positions are available July 1, 2010. Those interested should email their Curriculum Vitae, names and contact information for three references, and a brief summary of their research interests and goals to jcox@med.miami.edu. Include “Faculty search” in the subject line. Applications should be submitted by Feb. 15, 2010.

The University of Miami Miller School of Medicine is an equal opportunity/affirmative action employer. Women, minorities, veterans, and disabled persons are encouraged to apply.
