Need more electrodes?

USB-MEA256-System:

The USB-MEA256-System is a stand-alone plug-and-play data acquisition system from microelectrode arrays based on signal processing technology. All necessary components are combined in one device:

- Integrated amplifier for 252+4 channels: 252 channels from the microelectrode array plus 4 additional channels for e.g. simultaneous patch clamp recordings or any other analog signals such as temperature, pH, etc.

- Integrated Analog/ Digital board for converting analog signals into digital data streams.

- Integrated heating system.

- Easy adaption to our stimulus generators for current and voltage driven stimulation. Each electrode is selectable for stimulation.

- Microelectrode Arrays with 60μm, 100μm, and 200μm interelectrode distance available.

Chair of Neurobiology
Duke University School of Medicine

Duke University School of Medicine seeks a scientific and administrative leader to Chair the Department of Neurobiology. The Department consists of faculty whose expertise spans from molecular and cellular neuroscience to cognitive neuroscience. Candidates with a record of distinguished scholarship, administrative leadership and demonstrated commitment to excellence in research, education, mentoring and faculty development are encouraged to apply.

Applicants should submit their curriculum vitae to: Neurobiology Chair Search, c/o Kristen Orgera, kristen.orgera@duke.edu.

Mika Salpeter Lifetime Achievement Award
Supported by Sanofi-Aventis

The Society for Neuroscience is pleased to announce the call for nominations for the Mika Salpeter Lifetime Achievement Award, recognizing an individual with outstanding career achievements in neuroscience and contributions to the professional advancement of women in the field.

Nomination deadline: MAY 28
For details, please visit www.sfn.org/awards

Bernice Grafstein Award for Outstanding Accomplishments in Mentoring
Supported by Bernice Grafstein, PhD

The Society for Neuroscience is pleased to announce the call for nominations for the Bernice Grafstein Award for Outstanding Accomplishments in Mentoring, recognizing individuals dedicated to the promotion of women’s advancement in the field of neuroscience.

Nomination deadline: MAY 28
For details, please visit www.sfn.org/awards

Patricia Goldman-Rakic Hall of Honor

The Society for Neuroscience is pleased to announce the call for nominations for the Patricia Goldman-Rakic Hall of Honor, posthumously recognizing an accomplished neuroscientist who demonstrated unusual dedication to the advancement and entry of young women into field of neuroscience.

Nomination deadline: MAY 28
For details, please visit www.sfn.org/awards
Less dosing, more science

With durations up to 6 weeks, ALZET® Osmotic Pumps provide the convenience you need to focus on your research.

Simple and convenient dosing
Dosing lab animals can be time intensive. With automatic and reliable delivery, ALZET pumps simplify your research and ensure reproducible results. We offer 12 pump models with durations of up to 6 weeks and small sizes for use in mice. ALZET pumps are easy to use, with no complex programming or software to learn. There are no batteries or electronics to fail. Use the peace of mind and extra time to plan your next study.

Unlimited research possibilities
Connect any ALZET pump to a catheter and deliver your test agent right to the target site. Select from a range of ALZET catheters and brain infusion kits to enable direct administration of agents to blood vessels, spinal cord or cerebral ventricles.

Visit www.alzet.com for more information.
CAREER DEVELOPMENT AWARD
Supported by Merck and Co., Inc.

The Society for Neuroscience is pleased to announce the call for nominations for the Career Development Award, recognizing young neuroscientists who show achievement and promise in their fields.

Nomination deadline: MAY 28
For details, please visit www.sfn.org/awards

DONALD B. LINDSLEY PRIZE IN BEHAVIORAL NEUROSCIENCE
Supported by the Grass Foundation

The Society for Neuroscience is pleased to announce the call for nominations for the Donald B. Lindsley Prize, recognizing an outstanding PhD thesis in the area of behavioral neuroscience.

Nomination deadline: MAY 28
For details, please visit www.sfn.org/lindsley

RALPH W. GERARD PRIZE IN BEHAVIORAL NEUROSCIENCE
Supported by Lilly USA

The Society for Neuroscience is pleased to announce the first-ever call for nominations for the Ralph W. Gerard Prize in Behavioral Neuroscience, honoring outstanding contributions to neuroscience for 32 years.

Nomination deadline: JUNE 4
For details, please visit www.sfn.org/gerard

LOUISE HANSON MARSHALL SPECIAL RECOGNITION AWARD

The Society for Neuroscience is pleased to announce the call for nominations for the Louise Hanson Marshall Special Recognition Award, recognizing an individual working outside the field of neuroscience who has significantly promoted the professional advancement of women in the field.

Nomination deadline: MAY 28
For details, please visit www.sfn.org/awards
The Society for Neuroscience is pleased to announce the call for nominations for the Young Investigator Award, recognizing a young neuroscientist’s outstanding achievements and scientific contributions.

Nomination deadline: JUNE 11
For details, please visit www.sfn.org/yia

The Society for Neuroscience is pleased to announce the call for nominations for the Jacob P. Waletzky Award, presented to an outstanding young scientist currently researching or planning research in the area of substance abuse and the brain and nervous system.

Nomination deadline: JUNE 11
For details, please visit www.sfn.org/waletzky

The Society for Neuroscience is pleased to announce the call for nominations for the Research Awards for Innovation in Neuroscience, honoring imaginative research with the potential to lead to significant breakthroughs in the understanding of the brain and nervous system and related diseases.

Nomination deadline: JUNE 11
For details, please visit www.sfn.org/rain
See you in San Diego!
40th Annual Meeting of the Society for Neuroscience
November 13–17
Biovelocity.

Custom knockout mice and rats created in as few as 5 months with SAGEspeed™ custom model development. Exclusively from SAGE™ Labs.

Using proprietary CompoZr® ZFN technology and our patent-pending SAGEspeed™ process, SAGE™ Labs can produce genetically modified founders in less than half the time as conventional ES-Cell based methodology. Begin your drug development process sooner. Breakthrough faster with SAGEspeed.
