Hit the bullseye with the IonWorks Barracuda™ System and record both voltage-gated and rapidly desensitizing ligand-gated ion channels. The IonWorks Barracuda System simultaneously adds compound while recording from 384-wells at once. Building upon the IonWorks® Quattro System’s tradition, the IonWorks Barracuda System provides the highest throughput available at an affordable data point price. With blazingly fast throughput, you can screen large directed compound libraries, perform hit-to-lead applications, or support lead optimization programs using a direct electrophysiological assay.

For more information about the new IonWorks Barracuda System, visit our web site.
See you in San Diego!

40th Annual Meeting of the Society for Neuroscience

November 13–17
Program Directors

The National Institute of Neurological Disorders and Stroke (NINDS), a major component of the National Institutes of Health (NIH) and the Department of Health and Human Services (DHHS), has excellent opportunities for multiple candidates to join a highly interactive group of scientists and clinicians working across all areas of neuroscience and on a wide range of neurological disorders. The NINDS Division of Extramural Research (DER) seeks applications from exceptional, visionary candidates with distinguished records in basic, translational and/or clinical neuroscience research to serve as Program Directors in the fields of Stroke or Neural Biomedical Engineering. Applicants with particularly strong backgrounds in other areas of neuroscience or neurology will also be considered.

Qualifications

Successful candidates will be accomplished neuroscientists who have a strong commitment to the advancement of basic, translational and clinical research, a demonstrated record of research program management, and outstanding leadership skills. As Program Directors, they will conceive, develop, and oversee cutting-edge research programs in their areas of expertise.

Experience in basic neuroscience (genetic, molecular, cellular, circuit or systems level), translational neuroscience (therapy or diagnostic development) and/or clinical research or clinical practice in academic or for-profit institutions, is highly desirable. Applicants must have the capacity to interact effectively with national and international organizations and with individuals who represent wide-ranging views and competing priorities.

Additional criteria for selection will include: experience and skill in communicating scientific, programmatic, and policy information to lay and scientific audiences; skill in administrative and program management; a strong publication record in their field of research.

Applicants must possess a Ph.D. and/or M.D. degree, have experience in research program oversight, and demonstrate extensive involvement in independent and collaborative projects involving Stroke, Neural Biomedical Engineering or other areas of neuroscience/neurology.

Application Information

Applications may be submitted beginning 05/26/2010 to 07/16/2010. Application instructions can be found at the USAJobs Web Site (http://www.usajobs.gov), by searching on Vacancy Announcement for Health Scientist Administrator GS-0601-13/14: NINDS-10-416410-CR-DE or Medical Officer, GS-0602-13/14: NINDS-10-416411-DH. Applicants must be U.S. citizens. The salary ranges from $89,033 to $136,771 per annum and is commensurate with experience and qualifications. For more information, please contact Dr. Robert Finkelstein at finkelste@ninds.nih.gov.
Outstanding neuroscientists tell the stories of their scientific work in this fascinating series of autobiographical essays. Within their writings, they discuss major events that shaped their discoveries and their influences, as well as people who inspired them and helped shape their careers as neuroscientists.

**The History of Neuroscience in Autobiography, Vol. 1**

**The History of Neuroscience in Autobiography, Vol. 2**

**The History of Neuroscience in Autobiography, Vol. 3**

**The History of Neuroscience in Autobiography, Vol. 4**
Per Andersen, Mary Bunge, Jan Bures, Jean-Pierre Changeux, John Dowling, Oleh Hornykiewicz, Andrew Huxley, Jac Sue Kehoe, Ed Kravitz, James McGaugh, Randolf Menzel, Mircea Steriade, Richard Thompson, W. Maxwell Cowan (completed by Brent Stanfield).

**The History of Neuroscience in Autobiography, Vol. 5**

**The History of Neuroscience in Autobiography, Vol. 6**

**Autobiographical Video (Available in DVD Format)**
PBS personality Richard Thomas interviews eminent senior neuroscientists who reflect upon their lives, their dreams, and their work, and share their insights on what’s ahead in the field of neuroscience.

The #1 Cited Journal in Neuroscience*

Read *The Journal of Neuroscience* every week to keep up on what’s happening in the field.

- The number one cited journal in neuroscience
- The most neuroscience articles published each year — nearly 1,500 in 2008
- Impact factor 7.452
- Published 50 times a year
