Are you only scratching the surface?

If you are using any other method for ad libitum food intake measurements you are only scratching the surface. The BioDAQ Food & Water Intake Monitor records the native *episodic* intake behavior of rats and mice at very high resolution in their home cage. Discover the time and date of the initiation of feeding and drinking behavior, how much was consumed, and the period of the feeding or drinking activity.

CurePSP Symposium

The Foundation for PSP | CBD and Related Brain Diseases (CurePSP) will hold its Annual International Research Symposium in San Diego on Thursday, November 18, 2010 at the Embassy Suites San Diego Bay.

Registration is free
For registration contact Adrienne Bantum 1-800-457-4777 or bantum@curepsp.org.

Abstracts of 250-300 words for the poster session should be submitted by September 1, 2010 to the Scientific Director, Lawrence I. Golbe, MD at golbe@umdnj.edu.

For more details visit our website at www.curepsp.org.
See you in San Diego!
40th Annual Meeting of the Society for Neuroscience
November 13-17
Less dosing, more science

With durations up to 6 weeks, ALZET® Osmotic Pumps provide the convenience you need to focus on your research.

Simple and convenient dosing
Dosing lab animals can be time-intensive. With automatic and reliable delivery, ALZET pumps simplify your research and ensure reproducible results. We offer 12 pump models with durations of up to 6 weeks and small sizes for use in mice. ALZET pumps are easy to use, with no complex programming or software to learn. There are no batteries or electronics to fail. Use the peace of mind and extra time to plan your next study.

Unlimited research possibilities
Connect any ALZET pump to a catheter and deliver your test agent right to the target site. Select from a range of ALZET catheters and brain infusion kits to enable direct administration of agents to blood vessels, spinal cord or cerebral ventricles.

Visit www.alzet.com for more information.
