

The Journal of Neuroscience

September 8, 2010 • Volume 30 Number 36 • www.jneurosci.org

Cover legend: *In vivo* confocal image stack of nearly the entire zebrafish retina showing the emergence of associations between Müller glia (orange) and cone photoreceptors (purple) in the outer plexiform layer. For more information, see the article by Williams et al. in this issue (pages 11951–11961).
