**Cover legend:** Left hemisphere BOLD response to invalid mnemonic cueing (e.g., the cue “likely old” presented with an item correctly judged as new). Mosaic tiles are multi-angle and multi-color renderings of the invalid cueing contrast generated with MRlcroGL. Composite mosaic image generated with Steffen Schirmer’s Foto-Mosaik-Edda. For more information, see the article by O’Connor et al. in this issue (pages 2924–2934).
