Cover legend: Primary motor neurons in culture stained with a neurofilament antibody to visualize their highly polarized morphology. Nuclei are stained with DAPI (blue). The spinal muscular disease protein SMN facilitates the subcellular localization and trafficking of RNA-binding proteins and mRNAs along the long axonal processes. For more information, see the article by Fallini et al. in this issue (pages 3914–3925).

This Week in The Journal

Journal Club

3519 Decoupling of Acetylcholine Influx and Theta Power in the Hippocampus
Calvin K. Young and Jesse Jackson

Brief Communications

3560 Electrical Neuroimaging of Voluntary Audiospatial Attention: Evidence for a Supramodal Attention Control Network
Jessica J. Green, Sam M. Doesburg, Lawrence M. Ward, and John J. McDonald

3708 Temporal Uncertainty Separates Flashes from Their Background during Saccades
Femke Maij, Eli Brenner, and Jeroen B. J. Smeets

Articles

CELLULAR/MOLECULAR

3522 The Neural Cell Adhesion Molecule Promotes FGFR-Dependent Phosphorylation and Membrane Targeting of the Exocyst Complex to Induce Exocytosis in Growth Cones
Yana Chernyshova, Iryna Leshchyns'ka, Shu-Chan Hsu, Melitta Schachner, and Vladimir Sytnyk

3550 Glutamate Transport Decreases Mitochondrial pH and Modulates Oxidative Metabolism in Astrocytes
Guillaume Azarias, Hélène Perreten, Sylvain Lengacher, Damon Poburko, Nicolas Demaurex, Pierre J. Magistretti, and Jean-Yves Chatton

3565 Separation of Domain Contacts Is Required for Heterotetrameric Assembly of Functional NMDA Receptors
Anthony N. Farina, Katherine Y. Blain, Tomohiko Maruo, Witek Kwiatkowski, Senyon Choe, and Terunaga Nakagawa

3580 Impaired Activity-Dependent Plasticity of Quantal Amplitude at the Neuromuscular Junction of Rab3A Deletion and Rab3A Earlybird Mutant Mice
Xueyong Wang, Qingbo Wang, Shuzhang Yang, Maja Bucan, Mark M. Rich, and Kathrin L. Engisch

3625 Modulation of Canonical Transient Receptor Potential Channel 1 in the Proliferation of Oligodendrocyte Precursor Cells by the Golli Products of the Myelin Basic Protein Gene
Pablo M. Paez, Daniel Fulton, Vilma Spreuer, Vance Handley, and Anthony T. Campagnoni
Reorganization of the Primary Motor Cortex of Adult Macaque Monkeys after Sensory Loss Resulting from Partial Spinal Cord Injuries
Niranjan Kambi, Shashank Tandon, Hisham Mohammed, Leslee Lazar, and Neeraj Jain

Sleep Deprivation Biases the Neural Mechanisms Underlying Economic Preferences

Correction: The authors regret omissions in the following articles: “Medial Dorsal Hypothalamus Mediates the Inhibition of Reward Seeking after Extinction”, by Nathan J. Marchant, Teri M. Furlong, and Gavan P. McNally, which appeared on pages 14102–14115 of the October 20, 2010 issue; and “Lateral Hypothalamus Is Required for Context-Induced Reinstatement of Extinguished Reward Seeking” by Nathan J. Marchant, Adam S. Hamlin, and Gavan P. McNally, which appeared on pages 1331–1342 of the February 4, 2009 issue. Some details of the methods were omitted in the published versions of these manuscripts. Food and water were freely available before surgery and during the first 3 d postoperatively. During self-administration and extinction training, rats were allowed 1.5 h access to food and water following daily training sessions. These details do not affect the interpretation or conclusions.

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 1121 14th St., NW, Suite 1010, Washington, DC 20005, phone 202-962-4000.

Instructions for Authors are available at http://www.jneurosci.org/misc/itoa.shtml. Authors should refer to these Instructions online for recent changes that are made periodically.

Brief Communications Instructions for Authors are available via Internet (http://www.jneurosci.org/misc/ifa_bc.shtml).

Submissions should be submitted online using the following url: http://jneurosci.msubmit.net. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-962-4000; fax, 202-962-4945; e-mail, jn@sfn.org.
