## **Retraction: Savine and Braver, Motivated Cognitive Control: Reward Incentives Modulate Preparatory Neural Activity during Task-Switching**

*The Journal of Neuroscience* has received the findings of the Office of Research Integrity of the Department of Health and Human Services, which report substantial data misrepresentation in the article “Motivated Cognitive Control: Reward Incentives Modulate Preparatory Neural Activity during Task-Switching” by Adam C. Savine and Todd S. Braver, which appeared on pages 10294–10305 of the August 4, 2010 issue. Because the results cannot be considered reliable, *The Journal* is retracting the paper.
