Cover legend: Itch is an unpleasant sensation that evokes a desire to scratch. Many forms of chronic itch are insensitive to antihistamine treatment. The irritant receptor TRPA1 plays a key role in chronic itch. For more information, see Wilson et al. (pages 9283–9294). 9563 **Correction:** The article “Behavioral Transition from Attack to Parenting in Male Mice: A Crucial Role of the Vomeronasal System” by Kashiko S. Tachikawa, Yoshihiro Yoshihara, and Kumi O. Kuroda appeared on pages 5120–5126 of the March 20, 2013 issue. A correction for that article appears on page 9563.
