The perfect slice at the right price.

INTRODUCING THE NEW STANDARD IN TISSUE SLICING

PELCO easiSlicer™

Affordable Quality.
A fresh approach to traditional standards, the PELCO easiSlicer™ brings precision vibratory tissue slicing to labs of all sizes.

Consistent Reliability.
Solid construction and exceptional stability provides exacting control of section thickness with minimal z-axis vibration and consistently produces high quality sections.

Simple Versatility.
Simple, effective, manual design makes the PELCO easiSlicer™ perfect for multi-user and multi-application labs.

Professor In-Residence
University of California, Irvine
Institute for Memory Impairments and Neurological Disorders

The University of California, Irvine’s Institute for Memory Impairments and Neurological Disorders has an opportunity for a Director of Education. The Director of Education holds primary responsibility for educating the UCI community as well as the local community and special targeted audiences about MCI, AD and related dementias, as well as the activities of the Institute, through oral and written vehicles including, but not limited to, presentations, publications, and on-line tools. Activities of the Director of Education are designed to support the clinical research and fund development efforts of the Institute. The successful candidate will be expected to develop and maintain an independent and extramurally funded program of research at UCI and will be immediately responsible for drafting manuscripts for research using longitudinal cohort data. In addition, the candidate will have teaching assignments and will be expected to participate in the design of the curriculum of the department. Lastly, the successful candidate will support fund-raising activities through the development of foundation, corporate, and research grant proposals.

Requirements: Ph.D. in Neuroscience with expertise in the fields of aging, mild cognitive impairment and Alzheimer’s disease. Also required is extensive experience in program development, advanced writing skills, and many years experience with grant writing, including R01 and foundation grants. The applicant must have a strong background in community networking and presentations, developing and nurturing community partnerships, and developing and editing newsletters and must have knowledge of the current social media and how to use these as tools for communicating. The job requires strong organizational skills as well as mentoring skills for graduate research students.

The successful candidate will be appointed at the full Professor level in the Professor In-Residence Series in a school of medicine department and at the level that is commensurate with the education and experience of the individual candidate.

Application Procedure – Interested applicants should apply online through UCI RECRUIT at the following link: https://recruit.ap.uci.edu/apply/JPF02134. Please upload a letter of interest, curriculum vitae with record of research experience, and the names of three references before 12/1/2013.

The University of California, Irvine is an equal opportunity employer committed to excellence through diversity.
Who’s on NeurOnLine?

Emanuel DiCicco-Bloom
SfN Public Education and
Communication Committee Member
Robert Wood Johnson Medical School

Duke University

NeurOnLine is an SfN members-only online community where you can share great science, network, forge collaborations, and keep in touch—anytime, anywhere—within a trusted forum. As with the SfN annual meeting and The Journal of Neuroscience, NeurOnLine’s content and discussions will be generated by members, for members.

- Discuss emerging scientific findings
- Explore new tools and techniques
- Network year-round within the global community, nearly 42,000 members worldwide
- Share experiences and receive or provide mentoring on different career paths, stages, and challenges
- Get involved in public outreach, from Brain Awareness and science teaching to advocacy

NeurOnLine will help you advance your science and career on your schedule.

Share the wonders of the brain and mind with BrainFacts.org

Seeking resources to communicate with the public about neuroscience? Educating others through Brain Awareness activities?

*BrainFacts.org* can help you communicate how the brain works.

Explore *BrainFacts.org* for easy-to-use, accessible resources including:

- Information about hundreds of diseases and disorders
- Concepts about brain function
- Educational tools
- Multimedia tools and a social media community
- Interviews and discussions with leading researchers; and more
