

The Journal of Neuroscience

February 13, 2013 • Volume 33 Number 7 • www.jneurosci.org

Cover legend: Confocal reconstruction of a palisade ending located at the myotendinous junction of two muscle fibers stained with phalloidin (blue). The axon is stained with antibodies against neurofilament (red) and choline acetyltransferase (green), yielding a yellow appearance. For details, see the article by Zimmermann et al. (pages 2784–2793).
