Retraction: Tremere et al, “Mechanistic Basis and Functional Roles of Long-Term Plasticity in Auditory Neurons Induced by a Brain-Generated Estrogen”

The Journal of Neuroscience has received a report from Northwestern University that describes substantial data misrepresentation in the article “Mechanistic Basis and Functional Roles of Long-Term Plasticity in Auditory Neurons Induced by a Brain-Generated Estrogen” by Liisa A. Tremere, Ryan F. Kovaleski, Kalping Burrows, Jin Kwon Jeong, and Raphael Pinaud, which appeared on pages 16478–16495 of the November 14, 2012 issue. Because the results cannot be considered reliable, *J Neurosci* is retracting the paper.
