INSTITUTE

Innovation: Creating the next-generation institute

Aurora Health Care is adding renowned scientific and medical leaders to its team.

- Chief of Neurosurgery
- Cranial Neurosurgical Fellow
- Endovascular Specialist
- 2 Stroke Neurologists
- Complex Cranial Neurosurgeon
- 3 Spinal Neurosurgeons
- Neuromuscular Specialist

Aurora Neuroscience Innovation Institute (ANII), led by Amin Kassam, MD, has undergone a significant transformation at Aurora Health Care over the past 18 months. ANII represents an integrated service line that encompasses Neurology, Endovascular, Neurosurgery, Otolaryngology, Spine and Neuro-Ophthalmology, providing service from the clavicle to the follicle.

ANII has recently designed and built four dedicated avant-garde operating theaters that are at the forefront of technology. They have been the site of numerous technological and surgical “first-in-man” advances, including the integration of an optical surgical robot system for spinal and cranial neurosurgery, as well as head and neck surgery. These advances have not only led to treating patients from around the world, including

the Middle East, Europe and Asia, but also for hosting surgeons from across the globe.

In addition, ANII, in partnership with the Aurora Research Institute, has developed advanced imaging and cell-interrogation facilities. The research laboratory has brought together a talented team of physicians, engineers and basic scientists for the discovery and characterization of progenitor cells and subsequent development of novel therapeutic treatments.

Aurora Health Care is a not-for-profit health care system serving Wisconsin and Northern Illinois with 15 hospitals, more than 150 clinics and 30,000 employees. Aurora has been experiencing significant growth over the past decade, and is now a fully integrated system comprising more than 1,500 employed physicians.

To learn more about the many opportunities at the AURORA NEUROSCIENCE INNOVATION INSTITUTE, or to apply, contact Jennifer.Kwasny@aurora.org or 414-389-2544. Please include CV.

Neuroscience Faculty Recruitment

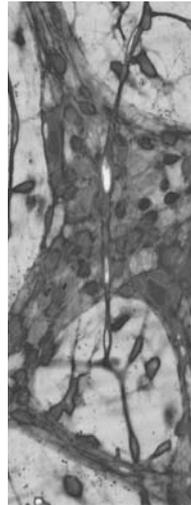

The Department of Neuroscience at Columbia University is currently recruiting faculty in the neurosciences. Areas of interest include research programs that: 1) employ genetic, genomic and evolutionary approaches to understand the neural basis of behavior; 2) exploit or develop state-of-the-art optical, chemical, electrical or computational methodology to link neural circuitry to behavior, especially in genetically-tractable mammalian model systems; 3) combine computational, behavioral and physiological approaches to study cognitive processes; and 4) explore emerging issues in molecular, cellular and developmental neurosciences.

Columbia University has an exceptionally strong and broad program in the neurosciences and aims to enhance interactions between basic and clinical research, and to link the neurosciences with a wide range of other disciplines within the University. New faculty will be affiliated with the Department of Neuroscience and the Doctoral Program in Neurobiology and Behavior. Research labs will be housed in the Zuckerman Mind Brain Behavior Institute on the Columbia Manhattanville campus. There are numerous opportunities for interaction with other scientific departments and programs at the Medical Center and Morningside Heights campuses.

The application deadline is **November 30, 2015**.

Columbia University takes affirmative action to ensure equal opportunity.

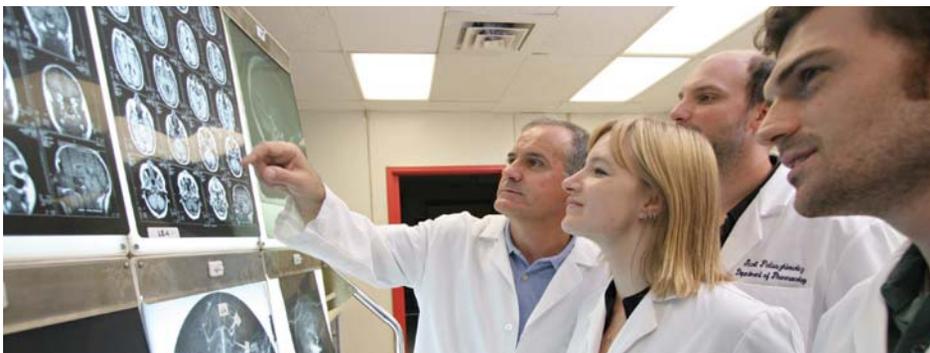

Become part of the world's largest organization of scientists and physicians devoted to understanding the brain and nervous system.

Join now and enjoy exclusive member benefits:

- Reduced fees and advanced registration for Neuroscience 2015
- Online subscription and reduced publication fees for *The Journal of Neuroscience*
- Abstract submission eligibility for the annual meeting
- Networking and scientific discussion on *NeurOnLine*
- Free online access to the *European Journal of Neuroscience*
- Premium career services through NeuroJobs
- And more!

Join now at SfN.org

Give to the Friends of SfN Fund

Join us in forging the future of neuroscience

Support a future of discovery and progress through travel awards and public education and outreach programs.

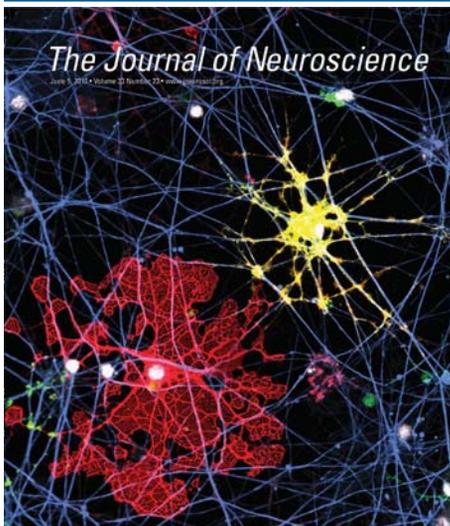

To inquire about specific initiatives or to make a tax-deductible contribution, visit SfN.org or email: development@sfn.org.

Automatic Membership Renewal Now Available

Sign Up for Automatic Membership Renewal

- **Save time** — Lessen your to-do list
- **Go green** — Eliminate paper invoices and their impact on the environment
- **Uninterrupted membership** — Never miss an issue of *The Journal of Neuroscience* or any of your valuable member benefits
- **Bonus Day** — Ensure access to your choice of prime housing for the annual meeting before the opening of advance member registration
- **Support the field** — Know your dues enhance professional development initiatives, public outreach, advocacy, and more

Sign up through “My SfN” at SfN.org

Join the Conversation

NeurOnline is an SfN members-only online community where you can share great science, network, forge collaborations, and keep in touch—anytime, anywhere—within a trusted forum. As with the SfN annual meeting and *The Journal of Neuroscience*, *NeurOnline*'s content and discussions will be generated *by* members, *for* members.

- Discuss emerging scientific findings
- Explore new tools and techniques
- Network year-round within the global community, nearly 42,000 members worldwide
- Share experiences and receive or provide mentoring on different career paths, stages, and challenges
- Get involved in public outreach, from Brain Awareness and science teaching to advocacy

NeurOnline will help you advance *your* science and career on *your* schedule.

ANNUAL REVIEWS ✨ SPARK A CONNECTION

VISIT US IN BOOTH #107 AT NEUROSCIENCE 2015
LEARN ABOUT THE NEW ANNUAL REVIEW OF VISION SCIENCE!

Annual Review of Neuroscience

Volume 38 • August 2015 • neuro.annualreviews.org

Editor: **Steven E. Hyman**, *Broad Institute of MIT and Harvard*

The *Annual Review of Neuroscience*, in publication since 1978, covers the significant developments across the entire field of neuroscience, including molecular and cellular neuroscience, neurogenetics, development, plasticity and repair, systems neuroscience, cognitive neuroscience, behavior, and neurobiology of disease, with occasional reviews in history of neuroscience and ethics.

Access this and all Annual Reviews journals via your institution at www.annualreviews.org.

TABLE OF CONTENTS FOR VOLUME 38:

- *Depression: A Decision-Theoretic Analysis*, Quentin J.M. Huys, Nathaniel D. Daw, Peter Dayan
- *Neuronal and Vascular Interactions*, Benjamin J. Andreone, Baptiste Lacoste, Chenghua Gu
- *The Genetics of Neuropsychiatric Diseases: Looking In and Beyond the Exome*, Erin L. Heinzen, Benjamin M. Neale, Stephen F. Traynelis, Andrew S. Allen, David B. Goldstein
- *Visual Guidance in Control of Grasping*, Peter Janssen, Hansjörg Scherberger
- *Neurodegenerative Diseases: Expanding the Prion Concept*, Lary C. Walker, Mathias Jucker
- *Neurological Aspects of Human Glycosylation Disorders*, Hudson H. Freeze, Erik A. Eklund, Bobby G. Ng, Marc C. Patterson
- *Glutamate Synapses in Human Cognitive Disorders*, Lenora Volk, Shu-Ling Chiu, Kamal Sharma, Richard L. Huganir
- *An Integrative Model of the Maturation of Cognitive Control*, Beatriz Luna, Scott Marek, Bart Larsen, Brenden Tervo-Clemmens, Rajpreet Chahal
- *Long-Range Neural Synchrony in Behavior*, Alexander Z. Harris, Joshua A. Gordon
- *Plasticity of Cortical Excitatory-Inhibitory Balance*, Robert C. Froemke
- *The Types of Retinal Ganglion Cells: Current Status and Implications for Neuronal Classification*, Joshua R. Sanes, Richard H. Masland
- *Global Order and Local Disorder in Brain Maps*, Gideon Rothschild, Adi Mizrahi
- *General Cortical and Special Prefrontal Connections: Principles from Structure to Function*, Helen Barbas
- *Cortical Folding: When, Where, How, and Why?* Georg F. Striedter, Shyam Srinivasan, Edwin S. Monuki
- *How Inhibitory Circuits in the Thalamus Serve Vision*, Judith A. Hirsch, Xin Wang, Friedrich T. Sommer, Luis M. Martinez
- *Chemosensory Receptor Specificity and Regulation*, Ryan P. Dalton, Stavros Lomvardas
- *Levels of Homology and the Problem of Neocortex*, Jennifer Dugas-Ford, Clifton W. Ragsdale
- *New Opportunities in Vasopressin and Oxytocin Research: A Perspective from the Amygdala*, Ron Stoop, Chloé Hegoburu, Erwin van den Burg
- *In Search of a Human Self-Regulation System*, William M. Kelley, Dylan D. Wagner, Todd F. Heatherton
- *Cell Types, Circuits, and Receptive Fields in the Mouse Visual Cortex*, Christopher Niell
- *The Brain's Default Mode Network*, Marcus E. Raichle
