A behind-the-scenes look at MICHAEL S. GAZZANIGA’s seminal work on the split-brain theory

“Big questions are Gazzaniga’s stock in trade.”
—New York Times

“[A]n essential read for scientists young and old, policy makers, and an informed public.”
—Marcus E. Raichle, professor at the Washington University School of Medicine, St. Louis

“The story of how science works interwoven with the life of a brilliant scientist. . . . A marvelous, exciting adventure, elegantly written.”
—Daniel J. Levitin, author of This Is Your Brain on Music: The Science of a Human Obsession

“In this beautiful narrative, Gazzaniga weaves together his own scientific achievements and gives us insight into the importance of his role as an inspired educator who single-handedly established the field of cognitive neuroscience. The deep philosophical implications of his work and the thrill of his journey reveal a life that has been enriched by science and enhanced by family, friends, fun, and humor.”
—Emilio Bizzi, M.D., Ph.D, MIT

**Assistant/Associate/Full Professor**

The Department of Neural and Behavioral Sciences, Pennsylvania State University College of Medicine invites applications from outstanding candidates for multiple tenure-eligible faculty positions at the Assistant or Associate Professor level. Successful candidates will be expected to have, or to establish, an active research program in neuroscience. Exceptional senior candidates with well-established research programs may also be considered.

The Department of Neural and Behavioral Sciences has developed excellence in a number of areas including central control of visceral organs, vision science, and the neurobiology of addiction. We will consider candidates whose expertise complements that of our existing programs, however, candidates using innovative approaches to study any aspect of neuroscience will be considered. Details of the departmental research interests can be found at our website [http://www2.med.psu.edu/nbs/](http://www2.med.psu.edu/nbs/)

The Department of Neural and Behavioral Sciences provides a competitive start-up package, remodeled laboratory space, excellent core facilities, and extensive opportunities for collaborative research and participation in graduate training programs.

Candidates should hold a Ph.D., M.D. or equivalent degree, and are asked to submit current curriculum vitae, statement of research interests and goals, and the names of at least three references.

**The #1 Cited Journal in Neuroscience**

*Read *The Journal of Neuroscience* every week to keep up on what’s happening in the field.*

• The number one cited journal in neuroscience
• The most neuroscience articles published each year—nearly 1,800 in 2011
• Impact factor 7.12
• Published 50 times a year

Learn more about member and institutional subscriptions at JNeurosci.org/subscriptions.
The Journal of Neuroscience is mobile!

Access all of your journal resources wherever you go

- *The Journal of Neuroscience* is available for comprehensive and universal mobile access.
- Gain quick access to *The Journal* articles, table of contents, and the features you have come to expect from the premier journal in the field
- Connect to *The Journal* from virtually any mobile device, anywhere a web connection is available

Neuroscience 2015

October 17-21
Share the wonders of the brain and mind with BrainFacts.org

Seeking resources to communicate with the public about neuroscience? Educating others through Brain Awareness activities?

BrainFacts.org can help you communicate how the brain works.

Explore BrainFacts.org for easy-to-use, accessible resources including:

- Information about hundreds of diseases and disorders
- Concepts about brain function
- Educational tools
- Multimedia tools and a social media community
- Interviews and discussions with leading researchers; and more
