Blueprint for Exceptional Customer Service

Since the inception of Fine Science Tools in 1974, it has been our goal to provide the highest quality surgical and microsurgical instruments to meet your research needs. To be sure we meet your high standards, every product we sell comes with our 100% satisfaction guarantee. If, for any reason, you are not completely satisfied with your purchase, you may return it for a full refund.
QUAD™, the newest Sutter Instrument motorized micromanipulator, is easy-to-use and features four independent axes. Three axes provide the X, Y, Z-orthogonal motion typical of most motorized micromanipulators. In the QUAD, Sutter introduces a true fourth axis to move the electrode coaxially at exactly the desired angle of approach. The X, Y and Z axes have a 25 mm range of motion, and the fourth, diagonal axis, has 30mm of travel to significantly extend the reach of the system.

FEATURES

- Four independent axes – 30mm travel in diagonal for coaxial pipette movement, 25mm travel in X, Y and Z
- Sub-micron resolution
- True diagonal assures coaxial movement
- Suited for in vivo electrophysiological recording
- Quiet mode eliminates electrical noise
- User-friendly, fanless compact controller with ROE preserves bench space
- Push button control for multiple functions – Work, Home, Quiet, Pulse and Relative
- Robotic Home and Work position moves for easy automated pipette exchange
