

JNeurosci

THE JOURNAL OF NEUROSCIENCE

June 7, 2017 • Volume 37 Number 23 • www.jneurosci.org

Cover legend: This confocal image shows hippocampal mossy fiber axons and boutons from adult-born dentate granule cells in an epileptic mouse brain. Adult-born granule cells and their mossy fiber axons in CA3 (red) were labeled with DcxCreER^{T2}::tdT transgenic mice. All mossy fiber boutons are stained with ZnT3 (green). Cell nuclei are labeled with DAPI (blue). For more information, see the article by Hendricks et al. (pages 5722–5735).
