

# THE JOURNAL OF NEUROSCIENCE

JANUARY 1985

VOLUME 5 NUMBER 1

THE OFFICIAL JOURNAL OF THE SOCIETY FOR NEUROSCIENCE

## CONTENTS

- WALROND, J. P., I. S. KASS, A. O. W. STRETTON, AND J. E. DONMOYER: Identification of Excitatory and Inhibitory Motoneurons in the Nematode *Ascaris* by Electrophysiological Techniques 1
- WALROND, J. P., AND A. O. W. STRETTON: Reciprocal Inhibition in the Motor Nervous System of the Nematode *Ascaris*: Direct Control of Ventral Inhibitory Motoneurons by Dorsal Excitatory Motoneurons 9
- WALROND, J. P., AND A. O. W. STRETTON: Excitatory and Inhibitory Activity in the Dorsal Musculature of the Nematode *Ascaris* Evoked by Single Dorsal Excitatory Motoneurons 16
- SELAKE, I., S. D. SKAPER, AND S. VARON: Pyruvate Participation in the Low Molecular Weight Trophic Activity for Central Nervous System Neurons in Glia-conditioned Media 23
- TEITELMAN, G., T. H. JOH, L. GRAYSON, D. H. PARK, D. J. REIS, AND L. IACOVITTI: Cholinergic Neurons of the Chick Ciliary Ganglia Express Adrenergic Traits *In Vivo* and *In Vitro* 29
- HINES, M., F. C. DAVIS, A. COQUELIN, R. W. GOY, AND R. A. GORSKI: Sexually Dimorphic Regions in the Medial Preoptic Area and the Bed Nucleus of the Stria Terminalis of the Guinea Pig Brain: A Description and an Investigation of Their Relationship to Gonadal Steroids in Adulthood 40
- CROLL, R. P., W. J. DAVIS, AND M. P. KOVAC: Neural Mechanisms of Motor Program Switching in the Mollusc *Pleurobranchaea*. I. Central Motor Programs Underlying Ingestion, Egestion, and the "Neutral" Rhythm(s) 48
- CROLL, R. P., M. P. KOVAC, AND W. J. DAVIS: Neural Mechanisms of Motor Program Switching in the Mollusc *Pleurobranchaea*. II. Role of the Ventral White Cell, Anterior Ventral, and B3 Buccal Neurons 56
- CROLL, R. P., M. P. KOVAC, W. J. DAVIS, AND E. M. MATERA: Neural Mechanisms of Motor Program Switching in the Mollusc *Pleurobranchaea*. III. Role of the Paracerebral Neurons and Other Identified Brain Neurons 64
- KISTLER, H. B., JR., R. D. HAWKINS, J. KOESTER, H. W. M. STEINBUSCH, E. R. KANDEL, AND J. H. SCHWARTZ: Distribution of Serotonin-immunoreactive Cell Bodies and Processes in the Abdominal Ganglion of Mature *Aplysia* 72
- BEN-BARAK, Y., J. T. RUSSELL, M. H. WHITNALL, K. OZATO, AND H. GAINER: Neurophysin in the Hypothalamo-Neurohypophysial System. I. Production and Characterization of Monoclonal Antibodies 81
- WHITNALL, M. H., S. KEY, Y. BEN-BARAK, K. OZATO, AND H. GAINER: Neurophysin in the Hypothalamo-Neurohypophysial System. II. Immunocytochemical Studies of the Ontogeny of Oxytocinergic and Vasopressinergic Neurons 98
- MCMANUS, O. B., AND J. R. MUSICK: Postsynaptic Block of Frog Neuromuscular Transmission by Conotoxin GI 110
- SWALES, L. S., AND N. J. LANE: Embryonic Development of Glial Cells and Their Junctions in the Locust Central Nervous System 117

*Contents continued on next page*

Cover picture: Horseradish peroxidase-filled ganglion cells in a flat mounted catfish retina.  $\times 700$ . Micrograph kindly provided by Drs. Ambrose Dunn-Meynell and Sansar Sharma.

Instructions to Authors appear in the January issue only. Copies of the Instructions can be obtained by writing the Society for Neuroscience, 11 Dupont Circle, N.W., Suite 130, Washington, DC 20036.

Contents continued

MASUKAWA, L. M., B. HEDLUND, AND G. M. SHEPHERD: Electrophysiological Properties of Identified Cells in the <i>In Vitro</i> Olfactory Epithelium of the Tiger Salamander	128
MASUKAWA, L. M., B. HEDLUND, AND G. M. SHEPHERD: Changes in the Electrical Properties of Olfactory Epithelial Cells in the Tiger Salamander after Olfactory Nerve Transection	136
ZIGMOND, R. E., C. BALDWIN, AND C. W. BOWERS: Rapid Recovery of Pineal Function after Partial Denervation: A Possible Role for Heteroneuronal Uptake of Transmitter in Modulating Synaptic Efficacy	142
NOVAK-HOFER, I., J. R. LEMOS, M. VILLERMAIN, AND I. B. LEVITAN: Calcium- and Cyclic Nucleotide-dependent Protein Kinases and Their Substrates in the <i>Aplysia</i> Nervous System	151
KAUFMAN, L. M., S. R. BARRY, AND J. N. BARRETT: Characterization of Tissue-derived Macromolecules Affecting Transmitter Synthesis in Rat Spinal Cord Neurons	160
MANAKER, S., A. WINOKUR, W. H. ROSTENE, AND T. C. RAINBOW: Autoradiographic Localization of Thyrotropin-releasing Hormone Receptors in the Rat Central Nervous System	167
STRAUSS, W. L., AND M. NIRENBERG: Inhibition of Choline Acetyltransferase by Monoclonal Antibodies	175
PUN, R. Y. K., K. C. MARSHALL, W. J. HENDELMAN, P. B. GUTHRIE, AND P. G. NELSON: Noradrenergic Responses of Spinal Neurons in Locus Coeruleus-Spinal Cord Co-Cultures	181
SZARO, B. G., Y. P. LOH, AND R. K. HUNT: Specific Changes in Axonally Transported Proteins during Regeneration of the Frog ( <i>Xenopus laevis</i> ) Optic Nerve	192
CROW, T.: Conditioned Modification of Phototactic Behavior in <i>Hermisenda</i> . I. Analysis of Light Intensity	209
CROW, T.: Conditioned Modification of Phototactic Behavior in <i>Hermisenda</i> . II. Differential Adaptation of B-Photoreceptors	215
SLAUGHTER, M. M., AND R. F. MILLER: Characterization of an Extended Glutamate Receptor of the ON Bipolar Neuron in the Vertebrate Retina	224
HOFFMAN, A. R., G. CEDA, AND T. D. REISINE: Corticotropin-releasing Factor Desensitization of Adrenocorticotrophic Hormone Release is Augmented by Arginine Vasopressin	234
TRUSSELL, L. O., AND A. D. GRINNELL: The Regulation of Synaptic Strength within Motor Units of the Frog Cutaneous Pectoris Muscle	243
