Sin et al. - Supplementary Figure 2
Supplementary Figure 3

(a) Time course of [H+]/[Na+] ratio changes following 1 μM caripride treatment in NHE1Δ556-564.

(b) Representative images of control (Con) and NHE1Δ556-564 cell phenotypes.

(c) Quantification of total number of neurites, number of 1st neurites, total length of neurites, length of 1st neurites, and length of branches in Con, NHE1, and NHE1Δ556-564 cells. 

Significance levels: n.s. = not significant, *** = p < 0.001.
