Errata: In the legend to the cover picture appearing in the July 1, 2000 issue, the following article information was omitted. The cover picture is from the article "Retinal Ganglion Cell Axon Guidance in the Mouse Optic Chiasm: Expression and Function of Robos and Slits," by Lynda Erskine, Scott E. Williams, Katja Brose, Thomas Kidd, Rivka A. Rachel, Corey S. Goodman, Mark Tessier-Lavigne, and Carol A. Mason, appearing on pages 4975-4982 of the issue. In addition, it should be noted that this article was published in conjunction with two related articles, also in the July 1, 2000 issue: "Slit2 Is a Repellent for Retinal Ganglion Cell Axons," by Simone P. Niclou, Li Jia, and Jonathan A. Raper (pages 4962-4974), and "Slit Inhibition and Retinal Axon Growth and Its Role in Retinal Axon Pathfinding and Innervation Patterns in the Diencephalon," by Thomas Ringstedt, Janet E. Braisted, Katja Brose, Thomas Kidd, Corey Goodman, Mark Tessier-Lavigne, and Dennis D. M. O'Leary (pages 4983–4991). In the legend to the cover picture appearing in the July 15, 2000 issue, the following article information was omitted. The cover picture is from the article "Selective Alterations in GABAA Receptor Subtypes in Human Temporal Lobe Epilepsy," by Fabienne Loup, Heinz-Gregor Wieser, Yasuhiro Yonekawa, Adriano Aguzzi, and Jean-Marc Fritschy, appearing on pages 5401-5419.

In the companion articles "Different Subthreshold Mechanisms Underlie Song Selectivity in Identified HVc Neurons of the Zebra Finch," by Richard Mooney, and "Intrinsic and Extrinsic Contributions to Auditory Selectivity in a Song Nucleus Critical for Vocal Plasticity," by Merri J. Rosen and Richard Mooney, which appeared in the July 15, 2000 issue, page numbers for the corresponding companion article were omitted in the reference list of each article and are as follows. In the article by Mooney, the page numbers for the citation for Rosen and Mooney should read 5437–5448. In the article by Rosen and Mooney, the page numbers for the citation for Mooney should read 5420–5436.

Cover picture: Kir4.1 potassium channel expression in glial cells of the retina. Astrocytes are shown in *blue*, Müller cells in *red*, and Kir4.1 channels in *green* in this triple-labeled confocal fluorescence image of the rat retina. The potassium channel is prominently expressed in Müller cell processes along blood vessels (*bottom left*) but not in astrocytes. Overlap of Kir4.1 channels and Müller cells is shown in *yellow*. The *black circles* are unlabeled ganglion cell somata, which are surrounded by Müller cell processes. Antibodies against glial fibrillary acidic protein (astrocytes), glutamine synthetase (Müller cells), and Kir4.1 were used. For details, see the article by Kofuji et al., in this issue (pages 5733–5740).

Instructions for Authors appear at the end of the January 1, 2000 issue. Copies of the Instructions can be obtained by writing to *The Journal of Neuroscience*, Society for Neuroscience, 11 Dupont Circle, NW, Suite 500, Washington, DC 20036, phone 202-462-6688, fax 202-462-1547, e-mail jn@sfn.org. The Instructions are also available via Internet (http://www.jneurosci.org/misc/itoa.shtml). *Rapid Communications* Instructions for Authors appear at the end of the January 15, 1999 issue and are also available via Internet (http://www.sfn.org/RapidComm/ifa.html). Submissions should be sent to the above address. Scientific inquiries concerning manuscripts can be made directly to Dr. Gordon M. Shepherd, Editor-in-Chief, *The Journal of Neuroscience*, Section of Neurobiology, Yale University School of Medicine, 333 Cedar Street, New Haven, CT 06510, phone 203-785-4336, fax 203-785-6990, e-mail jneurosci@yale.edu.

The Journal of Neuroscience requests that authors send a disk containing an electronic file of their manuscript with each submission. Most word processing software can be used; see the Instructions for Authors for detailed guidelines on acceptable disk and file formats.
