

THE JOURNAL OF NEUROSCIENCE

MAY 1981

VOLUME 1 NUMBER 5

THE OFFICIAL JOURNAL OF THE SOCIETY FOR NEUROSCIENCE

CONTENTS

PURVES, D., AND R. I. HUME: The Relation of Postsynaptic Geometry to the Number of Presynaptic Axons That Innervate Autonomic Ganglion Cells	441
FROMM, C., AND E. V. EVARTS: Relation of Size and Activity of Motor Cortex Pyramidal Tract Neurons during Skilled Movements in the Monkey	453
SOIFER, D., K. IQBAL, H. CZOSNEK, J. DE MARTINI, J. A. STURMAN, AND H. M. WISNIEWSKI: The Loss of Neuron-specific Proteins during the Course of Wallerian Degeneration of Optic and Sciatic Nerve	461
LEEB-LUNDBERG, F., A. SNOWMAN, AND R. W. OLSEN: Perturbation of Benzodiazepine Receptor Binding by Pyrazolopyridines Involves Picrotoxinin/Barbiturate Receptor Sites	471
FAUQUET, M., J. SMITH, C. ZILLER, AND N. M. LE DOUARIN: Differentiation of Autonomic Neuron Precursors <i>In Vitro</i> : Cholinergic and Adrenergic Traits in Cultured Neural Crest Cells	478
ACHESON, A. L., AND M. J. ZIGMOND: Short and Long Term Changes in Tyrosine Hydroxylase Activity in Rat Brain after Subtotal Destruction of Central Noradrenergic Neurons	493
NISHI, R., AND D. K. BERG: Two Components from Eye Tissue That Differentially Stimulate the Growth and Development of Ciliary Ganglion Neurons in Cell Culture	505
BROWNER, M., J. W. FERKANY, AND S. J. ENNA: Biochemical Identification of Pharmacologically and Functionally Distinct GABA Receptors in Rat Brain	514
DURHAM, D., T. A. WOOLSEY, AND L. KRUGER: Cellular Localization of 2- ³ H]Deoxy-D-glucose from Paraffin-embedded Brains	519
PARSONS, B., AND B. S. MCEWEN: Sequential Inhibition of Sexual Receptivity by Progesterone Is Prevented by a Protein Synthesis Inhibitor and Is Not Causally Related to Decreased Levels of Hypothalamic Progesterin Receptors in the Female Rat	527
ZARBIN, M. A., J. K. WAMSLEY, AND M. J. KUCHAR: Glycine Receptor: Light Microscopic Autoradiographic Localization with [³ H]Strychnine	532
SWANSON, L. W., P. E. SAWCHENKO, AND W. M. COWAN: Evidence for Collateral Projections by Neurons in Ammon's Horn, the Dentate Gyrus, and the Subiculum: A Multiple Retrograde Labeling Study in the Rat	548
Announcement	560

Instructions to Authors appear in the January issue only. Copies of the Instructions can be obtained by writing
The Society for Neuroscience, 9650 Rockville Pike, Bethesda, MD 20014.
