The Journal of Neuroscience

The Official Journal of the Society for Neuroscience

March 1991
Volume 11 Number 3

881 The Temporal Profile of 72-kDa Heat-Shock Protein Expression Following Global Ischemia
R.P. Simon, H. Cho, R. Gwinn, and D.H. Lowenstein

Cover picture: Invertebrates are attractive animals for physiological studies of learning and memory because of the relative simplicity of their central nervous systems. The central nervous system of the nudibranch mollusk *Hermissenda crassicornis* consists of many identifiable neurons that have been studied in detail in conditioned animals using biochemical, biophysical, and molecular techniques. A one-trial *in vivo* conditioning procedure that produces short- and long-term neuronal enhancement in identified neurons is described in the paper by Crow and Forrester (pp. 608–617). Photograph courtesy of T. Crow, University of Texas Medical School.

Erratum: S. R. Lehky and T. J. Sejnowski, the authors of "Neural Model of Stereoacuity and Depth Interpolation Based on a Distributed Representation of Stereo Disparity" (*The Journal of Neuroscience,* vol. 10 no. 7, July 1990, pp. 2281–2299) would like to acknowledge some errors in their published equations, although the results in the paper were obtained using the correct equations and therefore are not affected by the corrections. Equation 3 should read as follows:

Given this number, the value of p_i is given by:

$$p_i = \frac{2}{\sqrt{2\pi}} \int_{-\infty}^{d'} e^{-x^2/2} dx - 1 \tag{3}$$

The threshold criterion parameter was set to 0.50 rather than 0.75 correct discrimination.

Equation 9 should read:

$$\begin{bmatrix} 1.0 & -k^i_{AB} & 0.0 \\ -k^i_{BA} & 1.0 & -k^i_{BC} \\ 0.0 & -k^i_{CB} & 1.0 \end{bmatrix} \begin{bmatrix} r^i_A \\ r^i_B \\ r^i_C \end{bmatrix} = \begin{bmatrix} R^i(d_A) \\ 0.0 \\ R^i(d_C) \end{bmatrix} \tag{9}$$

Mechanism i: i = 1,17

Persons interested in becoming members of the Society for Neuroscience should address inquiries to the Society for Neuroscience, Suite 500, 11 Dupont Circle, N.W., Washington, D.C. 20036; (202) 462-6688.

Instructions to Authors appear in the January issue only. Copies of the Instructions can be obtained by writing *The Journal of Neuroscience,* Department of Neurobiology, Box 3209, 101G Bryan Building, Research Drive, Duke University Medical Center, Durham, NC 27710. Submissions should be sent to Dr. Dale Purves, editor-in-chief, at the same address. Inquiries concerning manuscripts can be made directly to Lucinda Paris, managing editor, at the offices of the *Journal* (919-684-3084; FAX 919-684-8573; Bitnet JNS@NEURO.DUKE.EDU).

The Journal of Neuroscience (ISSN 0270-6474) is the official journal of the Society for Neuroscience. It is published monthly for the Society, one volume a year, by Oxford University Press, 200 Madison Avenue, New York, NY 10016.

Subscriptions are on a per-volume basis beginning with the January issue. The volume 11 (1991) rate for the U.S. is $590. Outside the U.S. add $90; for air-expedited delivery add an additional $30. Single copies are $50. Reduced rates are available for members of the Society of Neuroscience. Address subscription and back issue requests to the Journals Fulfillment Department, Oxford University Press, 2001 Evans Road, Cary, NC 27513.

Change of Address notifications must be sent to Oxford's Journals Fulfillment Department at least 60 days in advance. Journals undeliverable because of incorrect addresses will be destroyed. Duplicates can be obtained (if available) from Oxford at the regular price of single issues.

Advertising inquiries should be addressed to Donald Pfarr, Williams & Wilkins, 428 E. Preston Street, Baltimore, MD 21202, telephone 301-528-4000.

Microfilm and *microfiche* inquiries should be directed to University Microfilms Inc., 300 North Zeeb Road, Ann Arbor, MI 48106.

Reprints of individual articles are available only from the authors.

Postmaster: Second class postage paid at Washington, DC, and at additional mailing offices; send address changes to the Journals Fulfillment Department, Oxford University Press, 2001 Evans Road, Cary, NC 27513.

The Journal of Neuroscience is indexed by *Chemical Abstracts, Current Contents, Excerpta Medica, Index Medicus,* and *Index to Scientific Reviews.*

The journal is printed on acid-free paper.
