

The Journal of Neuroscience

The Official Journal of
the Society for Neuroscience

April 1991
Volume 11 Number 4

- 891 **Feature Article:** Regulation of Growth Cone Behavior by Calcium
S.B. Kater and L.R. Mills
- 900 Spatial Retriktion of Light Adaptation and Mutation-Induced Inactivation in Fly
Photoreceptors
B. Minke and R. Payne
- 910 Dendritic Arbors of Large-Field Ganglion Cells Show Scaled Growth during Expansion of
the Goldfish Retina: A Study of Morphometric and Electrotonic Properties
S.A. Bloomfield and P.F. Hitchcock
- 918 Cloning and Expression of an *Aplysia* K⁺ Channel and Comparison with Native *Aplysia* K⁺
Currents
P.J. Pfaffinger, Y. Furukawa, B. Zhao, D. Dugan, and E.R. Kandel
- 928 κ - and δ -Opioids Block Sympathetically Dependent Hyperalgesia
Y.O. Taiwo and J.D. Levine
- 933 Sex Differences in the Corpus Callosum of the Living Human Being
L.S. Allen, M.F. Richey, Y.M. Chai, and R.A. Gorski
- 943 Regulation of Axonal Caliber, Neurofilament Content, and Nuclear Localization in Mature
Sensory Neurons by Nerve Growth Factor
B.G. Gold, W.C. Mobley, and S.F. Matheson
- 956 Ionic Currents of Cultured Olfactory Receptor Neurons from Antennae of Male *Manduca
 sexta*
F. Zufall, M. Stengl, C. Franke, J.G. Hildebrand, and H. Hatt
- 966 *N*-methyl-D-aspartate Antagonists Prevent Kainate Neurotoxicity in Rat Retinal Ganglion
Cells *in vitro*
N.J. Sucher, E. Aizenman, and S.A. Lipton
- 972 Inflammation near the Nerve Cell Body Enhances Axonal Regeneration
X. Lu and P.M. Richardson
- 979 Cell Dynamics in the Adult Mouse Olfactory Epithelium: A Quantitative Autoradiographic
Study
A. Mackay-Sim and P. Kittel
- 985 Characterization of a Calcium Current in a Vertebrate Cholinergic Presynaptic Nerve
Terminal
E.F. Stanley and G. Goping

- 994 The Effects of Parvocellular Lateral Geniculate Lesions on the Acuity and Contrast Sensitivity of Macaque Monkeys
W.H. Merigan, L.M. Katz, and J.H.R. Maunsell
- 1002 Single-Channel K⁺ Currents Recorded from the Somatic and Dendritic Regions of Cerebellar Purkinje Neurons in Culture
D.L. Gruol, T. Jacquin, and A.J. Yool
- 1016 Dopamine Differentially Regulates Dynorphin, Substance P, and Enkephalin Expression in Striatal Neurons: *In situ* Hybridization Histochemical Analysis
C.R. Gerfen, J.F. McGinty, and W.S. Young, III
- 1032 Distribution of Ca²⁺ Channels on Frog Motor Nerve Terminals Revealed by Fluorescent ω -Conotoxin
M.W. Cohen, O.T. Jones, and K.J. Angelides
- 1040 Activity-Dependent Development of Synaptic Varicosities at Crayfish Motor Terminals
G.A. Lnenicka, S.J. Hong, M. Combatti, and S. LePage
- 1049 The *N*-methyl-D-aspartate Antagonist, MK-801, Fails to Protect against Neuronal Damage Caused by Transient, Severe Forebrain Ischemia in Adult Rats
A. Buchan, H. Li, and W.A. Pulsinelli
- 1057 Furosemide Alters Organ of Corti Mechanics: Evidence for Feedback of Outer Hair Cells upon the Basilar Membrane
M.A. Ruggcro and N.C. Rich
- 1068 Substance P- and Enkephalin-like Immunoreactivities Are Colocalized in Certain Neurons of the Substantia Gelatinosa of the Rat Spinal Cord: An Ultrastructural Double-labeling Study
A. Ribeiro-da-Silva, E.P. Pioro, and A.C. Cuello
- 1081 Growth Cone Distribution Patterns in the Optic Nerve of Fetal Monkeys: Implications for Mechanisms of Axon Guidance
R.W. Williams, M. Borodkin, and P. Rakic
- 1095 Connections of Inferior Temporal Areas TE and TEO with Medial Temporal-Lobe Structures in Infant and Adult Monkeys
M.J. Webster, L.G. Ungerleider, and J. Bachevalier
- 1117 Tensile Regulation of Axonal Elongation and Initiation
J. Zheng, P. Lamoureux, V. Santiago, T. Dennerll, R.E. Buxbaum, and S.R. Heidemann
- 1126 Effects of Sphingosine, Staurosporine, and Phorbol Ester on Neurites of Rat Sympathetic Neurons Growing in Compartmented Cultures
R.B. Campenot, A.H. Walji, and D.D. Draker
- 1140 Inhibition by Bradykinin of Voltage-Activated Barium Current in a Rat Dorsal Root Ganglion Cell Line: Role of Protein Kinase C
L.M. Boland, A.C. Allen, and R. Dingleline
- 1150 Matching Neural and Muscle Oscillators: Control by FMRFamide-like Peptides
P. Meyrand and E. Marder

Cover picture: The head of a male house fly with green fluorescing eyes. The striking symmetrical orange blobs arise from a rhodopsin intermediate fluorescence excited by UV-blue light. The fluorescing pattern results from a superposition of the virtual images of a number of rhabdomeres seen when the microscope is focused deep below the surface of the

eye. The fluorescing visual pigment embedded in these rhabdomeres marks part of the region of the eye responsible for binocular vision. Such vision is used by the male to chase the female during mating behavior. Prepared by B. Minke and R. Payne (see pp. 900–909) with the help of E. Suss and A. Rom, at The Hebrew University of Jerusalem, Israel.

Erratum: The authors of “Transfected Rat High-Molecular-Weight Neurofilament (NF-H) Coassembles with Vimentin in a Predominantly Nonphosphorylated Form” (*The Journal of Neuroscience*, November 1990, 10:3714–3726) would like to point out that panels *A* and *B* of Figure 7 were reversed, and, as a result, the descriptions in the legend refer to the wrong panel. Thus the legend should have read: “Lanes *a–e* in *A* were immunoreacted with mAB SMI 32 (anti-non-phosphorylated NF), and lanes *a–e* in *B* were immunoreacted with the phosphorylation-dependent mAB SMI 31.” The remainder of the figure legend is correct.

Erratum: The publisher would like to acknowledge an error in the printing of “Calcium, Network activity, and the Role of NMDA Channels in Synaptic Plasticity *in vitro*,” by R. D. Fields, C. Yu, and P. G. Nelson (*The Journal of Neuroscience* 11:134–146, January 1991). In Table 2, the data element in line 2 under “Unstimulated side mean” should read 1.21 rather than 0.862. The publisher regrets this error.

Persons interested in becoming members of the Society for Neuroscience should address inquiries to the Society for Neuroscience, Suite 500, 11 Dupont Circle, N.W., Washington, D.C. 20036; (202) 462-6688.

Instructions to Authors appear in the January issue only. Copies of the Instructions can be obtained by writing *The Journal of Neuroscience*, Department of Neurobiology, Box 3209, 101G Bryan Building, Research Drive, Duke University Medical Center, Durham, NC 27710. Submissions should be sent to Dr. Dale Purves, editor-in-chief, at the same address. Inquiries concerning manuscripts can be made directly to Lucinda Paris and Dianitia Hutcheson, managing editors, at the offices of the *Journal* (919-684-3084; FAX 919-684-8573; Bitnet JNS@NEURO.DUKE.EDU).
