

**Erratum:** In “A Rhodopsin Gene Mutation Responsible for Autosomal Dominant Retinitis Pigmentosa Results in a Protein That Is Defective in Localization to the Photoreceptor Outer Segment” (C.-H. Sung, C. Makino, D. Baylor, and J. Nathans), which appeared on pages 5818–5833 in the October 1994 issue, the legend for Figure 6B on page 5825 should read: “*Continuous lines* show fits with exponential saturation functions [ $r/r_{\max} = 1 - \exp(-ki)$  where  $k$  is a constant that is proportional to the sensitivity of the cell. . . .”
