

**Erratum:** In the article “Basal Forebrain Lesions in Monkeys Disrupt Attention but Not Learning and Memory” (M.L. Voytko et al.), which appeared on pages 167–186 in the January 1994 issue, Table 1 contains incorrect data in two rows. The ChAT activity listed for regions 11 (temporal pole) and 12 (occipital lobe) should read as follows:

	Controls	Lesioned
11. Temporal pole	17.2 ± 2.6	7.5 ± 1.8
12. Occipital lobe	4.9 ± 0.6	3.9 ± 1.0
