

Correction: In the article “Nerve Growth Factor (NGF)-Mediated Protection of Neural Crest Cells from Antimitotic Agent-Induced Apoptosis: The Role of the Low-Affinity NGF Receptor” (Megan H. Cortazzo et al.), which appeared on pages 3895–3899 in the June 15, 1996 issue, the authors would like to correct an error in Figure 2C. Two of the symbols in Figure 2C were inadvertently switched. The control points incorrectly appeared as closed circles; they should have appeared as *open diamonds*. The points reflecting treatment with the NGF mutant and NCS incorrectly appeared as open diamonds; they should have appeared as *closed circles*. The corrected *panel C* appears below.
