

# The Journal of Neuroscience

The Official Journal of  
the Society for Neuroscience

April 1, 1996  
Volume 16 Number 7

---

Articles are grouped according to the section to which they were submitted and are presented in the following sequence: Cellular/Molecular, Developmental, Systems, and Behavioral Neuroscience.

- 2157 Interaction between the C Terminus of NMDA Receptor Subunits and Multiple Members of the PSD-95 Family of Membrane-Associated Guanylate Kinases  
*Martin Niethammer, Eunjoon Kim, and Morgan Sheng*
- 2164 Light and Dark Cause a Shift in the Spatial Expression of a Neuropeptide-Processing Enzyme in the Rat Retina  
*Cassandra L. Schlamp and Robert W. Nickells*
- 2172 NMDA Receptor Upregulation: Molecular Studies in Cultured Mouse Cortical Neurons after Chronic Antagonist Exposure  
*Paolo Follesa and Maharaj K. Ticku*
- 2179 Expression of the Putative Vesicular Acetylcholine Transporter in Rat Brain and Localization in Cholinergic Synaptic Vesicles  
*Michelle L. Gilmor, Norman R. Nash, Ali Roghani, Robert H. Edwards, Hong Yi, Steven M. Hersch, and Allan I. Levey*
- 2191 Glutamate Transporter mRNA Expression in Proliferative Zones of the Developing and Adult Murine CNS  
*Margaret L. Sutherland, Tracy A. Delaney, and Jeffrey L. Noebels*
- 2208 Context-Dependent Synaptic Action of Glycinergic and GABAergic Inputs in the Dorsal Cochlear Nucleus  
*Nace L. Golding and Donata Oertel*
- 2220 Membrane Depolarization Induces Calcium-Dependent Secretion of Tissue Plasminogen Activator  
*Anna Gualandris, Thomas E. Jones, Sidney Strickland, and Stella E. Tsirka*
- 2226 Changes in Action Potential Duration Alter Reliance of Excitatory Synaptic Transmission on Multiple Types of Ca<sup>2+</sup> Channels in Rat Hippocampus  
*David B. Wheeler, Andrew Randall, and Richard W. Tsien*
- 2238 DNA Strand Breaks Induced by Sustained Glutamate Excitotoxicity in Primary Neuronal Cultures  
*Michel Didier, Sherry Bursztajn, Emil Adamec, Lucius Passani, Ralph A. Nixon, Joseph T. Coyle, Jeanne Y. Wei, and Stephen A. Berman*
- 2251 Photopigment Transmittance Imaging of the Primate Photoreceptor Mosaic  
*Orin S. Packer, David R. Williams, and David G. Bensinger*

- 2261 Retina-Derived POU-Domain Factor-1: A Complex POU-Domain Gene Implicated in the Development of Retinal Ganglion and Amacrine Cells  
*Hao Zhou, Takashi Yoshioka, and Jeremy Nathans*
- 2275 Brain Cell Type Specificity and Gliosis-Induced Activation of the Human Cytomegalovirus Immediate-Early Promoter in Transgenic Mice  
*Jean-Marc Fritschy, Sebastian Brandner, Adriano Aguzzi, Marieke Koedood, Bernhard Lüscher, and Pamela J. Mitchell*
- 2283 Role of Neuron–Glial Junctional Domain Proteins in the Maintenance and Termination of Neuronal Migration across the Embryonic Cerebral Wall  
*Eva S. Anton, Richard S. Cameron, and Pasko Rakic*
- 2294 Inhibition of Protein Tyrosine Kinases Impairs Axon Extension in the Embryonic Optic Tract  
*Terri Worley and Christine Holt*
- 2307 Modulated Expression of Plasminogen Activator System Components in Cultured Cells from Dissociated Mouse Dorsal Root Ganglia  
*Steven M. Hayden and Nicholas W. Seeds*
- 2318 An Intrinsic Time Limit between Genesis and Death of Individual Neurons in the Developing Retinal Ganglion Cell Layer  
*Lucia Galli-Resta and Monica Ensini*
- 2325 Nitric Oxide Delays the Death of Trophic Factor-Deprived PC12 Cells and Sympathetic Neurons by a cGMP-Mediated Mechanism  
*Stephen E. Farinelli, David S. Park, and Lloyd A. Greene*
- 2335 GDNF Slows Loss of Motoneurons but Not Axonal Degeneration or Premature Death of *pmn/pm*n Mice  
*Y. Sagot, S. A. Tan, J. P. Hammang, P. Aebischer, and A. C. Kato*
- 2342 A Calcitonin Gene-Related Peptide Receptor Antagonist Prevents the Development of Tolerance to Spinal Morphine Analgesia  
*Daniel P. Ménard, Denise van Rossum, S. Kar, S. St. Pierre, M. Sutak, K. Jhamandas, and Rémi Quirion*
- 2352 Localization and Function of a 5-HT Transporter in Crypt Epithelia of the Gastrointestinal Tract  
*P. R. Wade, J. Chen, B. Jaffe, I. S. Kassem, R. D. Blakely, and M. D. Gershon*
- 2365 Chronic Antidepressant Administration Increases the Expression of cAMP Response Element Binding Protein (CREB) in Rat Hippocampus  
*Masashi Nibuya, Eric J. Nestler, and Ronald S. Duman*
- 2373 Chronic Hyponatremia Reduces Survival of Magnocellular Vasopressin and Oxytocin Neurons after Axonal Injury  
*Janos Dohanics, Gloria E. Hoffman, and Joseph G. Verbalis*
- 2381 Stimulus-Dependent Synchronization of Neuronal Responses in the Visual Cortex of the Awake Macaque Monkey  
*Andreas K. Kreiter and Wolf Singer*

- 2397 The Origins of Two-State Spontaneous Membrane Potential Fluctuations of Neostriatal Spiny Neurons  
*Charles J. Wilson and Yasuo Kawaguchi*
- 2411 D<sub>1</sub> Dopamine Receptor Activation Is Necessary for the Induction of Sensitization by Amphetamine in the Ventral Tegmental Area  
*Paul Vezina*

**Cover picture:** A migrating cortical neuron (*green*) attached to a radial glial process (*red*) from a tissue imprint culture of embryonic rat cerebrum. The site of contact between the neuronal cell soma and the glial process (*purple*) is labeled with a monoclonal antibody (NJPA1) to a neuron–glial junctional domain protein crucial for cortical neuronal migration. The glial process is labeled with GFAP, and the migrating neuron is labeled with TuJ-1 mAb to neuron-specific class III  $\beta$ -tubulin. NJPA1 mAb label was superimposed onto this double-label image. For details, see the article by Anton et al. in this issue (pp. 2283–2293).

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 11 Dupont Circle, NW, Suite 500, Washington, DC 20036, phone 202-462-6688.

Instructions for Authors appear at the end of the January 1, 1996 issue. Copies of the Instructions can be obtained by writing to Diane M. Sullenberger, Director of Publications, *The Journal of Neuroscience*, Society for Neuroscience, 11 Dupont Circle, NW, Suite 500, Washington, DC 20036, phone 202-462-6688, fax 202-462-1547, e-mail [jn@sfn.org](mailto:jn@sfn.org). The Instructions are also available via Internet (<http://www.sfn.org/>) and the Society's Gopher server (Host: [gopher.sfn.org](http://gopher.sfn.org). Port: 70.). Submissions should be sent to the above address. Scientific inquiries concerning manuscripts can be made directly to Dr. David C. Van Essen, Editor-in-Chief, *The Journal of Neuroscience*, Box 8108, Washington University School of Medicine, 660 South Euclid Avenue, St. Louis, MO 63110, phone 314-362-2721, fax 314-362-2734, e-mail [JNEUROSCI@THALAMUS.WUSTLE.EDU](mailto:JNEUROSCI@THALAMUS.WUSTLE.EDU).

*The Journal of Neuroscience* requests that authors send a disk containing an electronic file of their manuscript with each submission. Most word processing software can be used; see the Instructions for Authors for detailed guidelines on acceptable disk and file formats.
