

The Journal of Neuroscience

January 21, 2004 • Volume 24 Number 3 www.jneurosci.org

Cover picture: Proper development of sympathetic innervation of the gastrointestinal tract is critical for its function. Whole-mount tyrosine hydroxylase immunostaining of the mouse gastrointestinal tract reveals the extent of perinatal sympathetic innervation, with sympathetic axons traveling along mesenteric arterial vasculature supplying blood to the intestines. NGF plays a crucial role in the development of this intricate pattern of sympathetic target innervation independently of its requirement for neuron survival. For details, see the article by Glebova and Ginty in this issue (pages 743–751).

i This Week in the Journal

Brief Communications

- 589 **Reduced Serotonin Type 1_A Receptor Binding in Panic Disorder**
Alexander Neumeister, Earle Bain, Allison C. Nugent, Richard E. Carson, Omer Bonne, David A. Luckenbaugh, William Eckelman, Peter Herscovitch, Dennis S. Charney, and Wayne C. Drevets
- 592 **M Channels Containing KCNQ2 Subunits Modulate Norepinephrine, Aspartate, and GABA Release from Hippocampal Nerve Terminals**
Maria Martire, Pasqualina Castaldo, Monia D'Amico, Paolo Preziosi, Lucio Annunziato, and Maurizio Tagliatela
- 615 **The Suprachiasmatic Nucleus Entrain, But Does Not Sustain, Circadian Rhythmicity in the Olfactory Bulb**
Daniel Granados-Fuentes, Laura M. Prolo, Ute Abraham, and Erik D. Herzog

Articles

CELLULAR/MOLECULAR

- 661 **Distance-Dependent Scaling of Calcium Transients Evoked by Backpropagating Spikes and Synaptic Activity in Dendrites of Hippocampal Interneurons**
Balazs Rozsa, Tibor Zelles, E. Sylvester Vizi, and Balazs Lendvai
- 679 **A C-Terminal Determinant of GluR6 Kainate Receptor Trafficking**
Sheng Yan, James M. Sanders, Jian Xu, Yongling Zhu, Anis Contractor, and Geoffrey T. Swanson
- 722 **Intracellular Astrocyte Calcium Waves *In Situ* Increase the Frequency of Spontaneous AMPA Receptor Currents in CA1 Pyramidal Neurons**
Todd A. Fiacco and Ken D. McCarthy
- 762 **Menthol-Induced Ca²⁺ Release from Presynaptic Ca²⁺ Stores Potentiates Sensory Synaptic Transmission**
Kenzo Tsuzuki, Hong Xing, Jennifer Ling, and Jianguo G. Gu

DEVELOPMENT/PLASTICITY/REPAIR

- 711 **The Development of Mother–Infant Interactions after Neonatal Amygdala Lesions in Rhesus Monkeys**
M. D. Bauman, P. Lavenex, W. A. Mason, J. P. Capitanio, and D. G. Amaral
- 743 **Heterogeneous Requirement of NGF for Sympathetic Target Innervation *In Vivo***
Natalia O. Glebova and David D. Ginty

BEHAVIORAL/SYSTEMS/COGNITIVE

- 598 **Locus Ceruleus Activation Initiates Delayed Synaptic Potentiation of Perforant Path Input to the Dentate Gyrus in Awake Rats: A Novel β -Adrenergic- and Protein Synthesis-Dependent Mammalian Plasticity Mechanism**
Susan G. Walling and Carolyn W. Harley
- 605 **The Transition from Development to Motor Control Function in the Corticospinal System**
Zhuo Meng, Qun Li, and John H. Martin
- 628 **Cortical Synaptogenesis and Motor Map Reorganization Occur during Late, But Not Early, Phase of Motor Skill Learning**
Jeffrey A. Kleim, Theresa M. Hogg, Penny M. VandenBerg, Natalie R. Cooper, Rochelle Bruneau, and Michael Remple
- 634 **Columnar Specificity of Microvascular Oxygenation and Volume Responses: Implications for Functional Brain Mapping**
Sameer A. Sheth, Masahito Nemoto, Michael Guiou, Melissa Walker, Nader Pouratian, Nathan Hageman, and Arthur W. Toga
- 642 **Changes in the Effect of Spinal Prostaglandin E₂ during Inflammation: Prostaglandin E (EP1–EP4) Receptors in Spinal Nociceptive Processing of Input from the Normal or Inflamed Knee Joint**
Karl-Jürgen Bär, Gabriel Natura, Alejandro Telleria-Diaz, Philipp Teschner, Regine Vogel, Enrique Vasquez, Hans-Georg Schaible, and Andrea Ebersberger
- 652 **Coordinate Synaptic Mechanisms Contributing to Olfactory Cortical Adaptation**
Aaron R. Best and Donald A. Wilson
- 733 **Firing Patterns of Type II Spiral Ganglion Neurons *In Vitro***
Michael A. Reid, Jacqueline Flores-Otero, and Robin L. Davis
- 752 **Posterior Triangular Thalamic Neurons Convey Nociceptive Messages to the Secondary Somatosensory and Insular Cortices in the Rat**
Caroline Gauriau and Jean-François Bernard

NEUROBIOLOGY OF DISEASE

- 620 **Neurons and Astrocytes Respond to Prion Infection by Inducing Microglia Recruitment**
Mathieu Marella and Joëlle Chabry
- 671 **Role of Matrix Metalloproteinases in Delayed Neuronal Damage after Transient Global Cerebral Ischemia**
Seong-Ryong Lee, Kiyoshi Tsuji, Sun-Ryung Lee, and Eng H. Lo
- 692 **Overexpression of Adenosine Kinase in Epileptic Hippocampus Contributes to Epileptogenesis**
Nicolette Gouder, Louis Scheurer, Jean-Marc Fritschy, and Detlev Boison
- 702 **Neural Bases of Set-Shifting Deficits in Parkinson's Disease**
Oury Monchi, Michael Petrides, Julien Doyon, Ronald B. Postuma, Keith Worsley, and Alain Dagher

Correction: In the article "Evidence for Chelatable Zinc in the Extracellular Space of the Hippocampus, But Little Evidence for Synaptic Release of Zn," by Alan R. Kay, which appeared on pages 6847–6855 of the July 30, 2003 issue, the wrong name, acronym, and structure of the transition metal chelator were inadvertently given. The chemical name of the chelator is ethylenediamine-*N,N'*-diacetic-*N,N'*-di- β -propionic acid rather than ethylenediiminodi-2-pentanedioic acid, and its acronym is EDPA rather than EDDG. EDPA is available from Aldrich as catalog number 28,584-6. In Figure 1a, the chemical structure should be replaced by the following one:

Also, the first sentence on page 6852 should begin “If the value of f_{\max}/f_{\min} is”

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 11 Dupont Circle, NW, Suite 500, Washington, DC 20036, phone 202-462-6688.

Instructions for Authors are available at <http://www.jneurosci.org/misc/itoa.shtml>. Authors should refer to these Instructions online for recent changes that are made periodically.

Brief Communications Instructions for Authors are available via Internet (<http://www.sfn.org/content/Publications/TheJournalofNeuroscience/BriefComm/ifa.html>).

Submissions should be submitted online using the following url: <http://sfn.manuscriptcentral.com>. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-462-6688; fax, 202-462-1547; e-mail, jn@sfn.org.
