

The Journal of Neuroscience

September 6, 2006 • Volume 26 Number 36 www.jneurosci.org

Cover legend: Information from different reward and cognitive-related cortical areas terminate in both separate and converging striatal regions. The schematic drawings illustrate the cortical terminal fields at different rostrocaudal levels. Each color represents different cortical areas (pink, ventral, medial prefrontal cortex; dark orange, orbital prefrontal cortex; light orange, dorsal anterior cingulate cortex; yellow, dorsolateral prefrontal cortex). There are two labeling patterns, a focal projection field consisting of dense terminal fields (illustrated in the top right hand corner) and a diffuse projection consisting of clusters of fibers, extending throughout a wide striatal region. The bottom panel shows diffuse terminals superimposed onto the dense projection illustrating the interface of the diffuse and focal projections. For more information see the article by Haber et al., in the August 9, 2006 issue (Vol 26, Issue 32, 8368–8376).

i This Week in The Journal

Editorial

9077 **An Open Question**

Commentary

9078 **Why Open Access to Research and Scholarship?**

John Willinsky

Journal Club

9080 **Heroin Addiction: Anticipating the Reward of Heroin or the Agony of Withdrawal?**

Magalie Lenoir and Ronald Keiflin

9082 **It Is Time to Move: Role of Lateral Diffusion in AMPA Receptor Trafficking**

Guang Yang, Alan Huang, Shanshan Zhu, and Wei Xiong

Brief Communications

9130 **Contrasting Roles of Corticosteroid Receptors in Hippocampal Plasticity**

Avi Avital, Menahem Segal, and Gal Richter-Levin

Articles

CELLULAR/MOLECULAR

9084 **Nonlinear Interaction between Shunting and Adaptation Controls a Switch between Integration and Coincidence Detection in Pyramidal Neurons**

Steven A. Prescott, Stéphanie Ratté, Yves De Koninck, and Terrence J. Sejnowski

9227 **The Role of G-Protein-Coupled Receptor Kinase 5 in Pathogenesis of Sporadic Parkinson's Disease**

Shigeki Arawaka, Manabu Wada, Saori Goto, Hiroki Karube, Masahiro Sakamoto, Chang-Hong Ren, Shingo Koyama, Hikaru Nagasawa, Hideki Kimura, Toru Kawanami, Keiji Kurita, Katsushi Tajima, Makoto Daimon, Masanori Baba, Takashi Kido, Sachiko Saino, Kaoru Goto, Hironobu Asao, Chihumi Kitanaka, Emi Takashita, Seiji Hongo, Takao Nakamura, Takamasa Kayama, Yoshihiro Suzuki, Kazuo Kobayashi, Tadashi Katagiri, Katsuro Kurokawa, Masayuki Kurimura, Itaru Toyoshima, Kazuhiro Niizato, Kuniaki Tsuchiya, Takeshi Iwatsubo, Masaaki Muramatsu, Hiroto Matsumine, and Takeo Kato

9312 **Astrocytic Glutamate Is Not Necessary for the Generation of Epileptiform Neuronal Activity in Hippocampal Slices**

Tommaso Fellin, Marta Gomez-Gonzalo, Sara Gobbo, Giorgio Carmignoto, and Philip G. Haydon

- 9323 **Deletion of the GABA_A Receptor α 1 Subunit Increases Tonic GABA_A Receptor Current: A Role for GABA Uptake Transporters**
Pavel I. Ortinski, Jill R. Turner, Andrea Barberis, Gholam Motamedi, Robert P. Yasuda, Barry B. Wolfe, Kenneth J. Kellar, and Stefano Vicini
- 9332 **The Activation of Excitatory Glutamate Receptors Evokes a Long-Lasting Increase in the Release of GABA from Cerebellar Stellate Cells**
Siqiong June Liu and Philippe Lachamp
- 9340 **Activation of P2Y₁ Nucleotide Receptors Induces Inhibition of the M-Type K⁺ Current in Rat Hippocampal Pyramidal Neurons**
Alexander K. Filippov, Roy C. Y. Choi, Joseph Simon, Eric A. Barnard, and David A. Brown

DEVELOPMENT/PLASTICITY/REPAIR

- 9135 **High Levels of New Neuron Addition Persist When the Sensitive Period for Song Learning Is Experimentally Prolonged**
Linda Wilbrecht, Heather Williams, Nidhi Gangadhar, and Fernando Nottebohm
- 9153 **Photic Regulation of Arylalkylamine *N*-Acetyltransferase Binding to 14-3-3 Proteins in Retinal Photoreceptor Cells**
Nikita Pozdeyev, Carla Taylor, Rashidul Haque, Shyam S. Chaurasia, Amy Visser, Aamera Thazyeen, Yuhong Du, Haian Fu, Joan Weller, David C. Klein, and P. Michael Iuvone
- 9184 **Unipolar Brush Cells of the Cerebellum Are Produced in the Rhombic Lip and Migrate through Developing White Matter**
Chris Englund, Tom Kowalczyk, Ray A. M. Daza, Avner Dagan, Charmaine Lau, Matthew F. Rose, and Robert F. Hevner
- 9282 **Abnormal Positioning of Diencephalic Cell Types in Neocortical Tissue in the Dorsal Telencephalon of Mice Lacking Functional Gli3**
Vassiliki Fotaki, Tian Yu, Paulette A. Zaki, John O. Mason, and David J. Price
- 9293 **The B' Protein Phosphatase 2A Regulatory Subunit *well-rounded* Regulates Synaptic Growth and Cytoskeletal Stability at the *Drosophila* Neuromuscular Junction**
Natasha M. Viquez, Caroline R. Li, Yogesh P. Wairkar, and Aaron DiAntonio

BEHAVIORAL/SYSTEMS/COGNITIVE

- 9098 **Orientation-Specific Computation in Stereoscopic Vision**
Bart Farell
- 9107 **Cerebellar Contributions to Locomotor Adaptations during Splitbelt Treadmill Walking**
Susanne M. Morton and Amy J. Bastian
- 9117 **The Role of Feedback in Shaping the Extra-Classical Receptive Field of Cortical Neurons: A Recurrent Network Model**
Lars Schwabe, Klaus Obermayer, Alessandra Angelucci, and Paul C. Bressloff
- 9142 **The Effect of Lateral Septum Corticotropin-Releasing Factor Receptor 2 Activation on Anxiety Is Modulated by Stress**
Brook Henry, Wylie Vale, and Athina Markou
- 9162 **Differential Encoding Mechanisms for Subsequent Associative Recognition and Free Recall**
Bernhard P. Staresina and Lila Davachi
- 9173 **Ambiguous Encoding of Stimuli by Primary Sensory Afferents Causes a Lack of Independence in the Perception of Multiple Stimulus Attributes**
Bruce A. Carlson and Masashi Kawasaki

- 9196 **ΔFosB in the Nucleus Accumbens Regulates Food-Reinforced Instrumental Behavior and Motivation**
Peter Olausson, J. David Jentsch, Natalie Tronson, Rachel L. Neve, Eric J. Nestler, and Jane R. Taylor
- 9205 **Angiotensin-II Is a Putative Neurotransmitter in Lactate-Induced Panic-Like Responses in Rats with Disruption of GABAergic Inhibition in the Dorsomedial Hypothalamus**
Anantha Shekhar, Philip L. Johnson, Tammy J. Sajdyk, Stephanie D. Fitz, Stanley R. Keim, Pamela E. Kelley, Donald R. Gehlert, and Joseph A. DiMicco
- 9216 **Deciphering the Spike Train of a Sensory Neuron: Counts and Temporal Patterns in the Rat Whisker Pathway**
Ehsan Arabzadeh, Stefano Panzeri, and Mathew E. Diamond
- 9239 **Integration of Exogenous Input into a Dynamic Salience Map Revealed by Perturbing Attention**
Puiu F Balan and Jacqueline Gottlieb
- 9264 **Mode of Functional Connectivity in Amygdala Pathways Dissociates Level of Awareness for Signals of Fear**
Leanne M. Williams, Pritha Das, Belinda J. Liddell, Andrew H. Kemp, Christopher J. Rennie, and Evian Gordon
- 9272 **Transcranial Magnetic Stimulation over Sensorimotor Cortex Disrupts Anticipatory Reflex Gain Modulation for Skilled Action**
Toshitaka Kimura, Patrick Haggard, and Hiroaki Gomi

NEUROBIOLOGY OF DISEASE

- 9250 **Protecting Motor Neurons from Toxic Insult by Antagonism of Adenosine A2a and Trk Receptors**
Jelena Mojsilovic-Petrovic, Goo-Bo Jeong, Amanda Crocker, Amrita Arneja, Samuel David, David Russell, and Robert G. Kalb
- 9304 **α-Synuclein Overexpression Increases Cytosolic Catecholamine Concentration**
Eugene V. Mosharov, Roland G. W. Staal, Jordi Bové, Delphine Prou, Anthonia Hananiya, Dmitriy Markov, Nathan Poulsen, Kristin E. Larsen, Candace M. H. Moore, Matthew D. Troyer, Robert H. Edwards, Serge Przedborski, and David Sulzer

Corrections: In the article “Rule Learning and Reward Contingency Are Associated with Dissociable Patterns of Dopamine Activation in the Rat Prefrontal Cortex, Nucleus Accumbens and Dorsal Striatum” by Mark R. Stefani and B. Moghaddam, which appears on pages 8810–8818 of the August 23, 2006 issue, the affiliation for Mark R. Stefani should have been listed as Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. Middlebury College was not affiliated with any aspect of this work. Please note that this was an author error and not a journal error.

In the article “Aberrant GABA_A Receptor Expression in the Dentate Gyrus of the Epileptic Mutant Mouse Stargazer” by Helen L. Payne, Peter S. Donoghue, William M. K. Connelly, Sabine Hinterreiter, Priyanka Tiwari, Jane H. Ives, Victoria Hann, Werner Sieghart, George Lees, and Christopher L. Thompson, which appears on pages 8600–8608 of the August 16, 2006 issue, the units for the mean area of mIPSCs from granule cells were incorrectly printed as pA/ms and nA/ms instead of pA·ms and nA·ms in several places in the article. Thus, in the Materials and Methods section, page 8602, under Electrophysiology, “. . . threshold criteria of 10 pA and 50 pA/ms” should have been, “. . . threshold criteria of 10pA and 50pA·ms.” In the Results sections, page 8604, under Do the GABAR subunit changes result in modifications to synaptic GABA function, “. . . (0.435 ± 0.039 nA/ms for +/+ vs. 0.43 ± 0.04 nA/ms for *stg*; *n* = 4; *p* > 0.05, unpaired *t* test) (Fig. 5)” should have been, “. . . (0.435 ± 0.039 nA·ms for +/+ vs. 0.43 ± 0.04 nA·ms for *stg*; *n* = 4; *p* > 0.05, unpaired *t* test) (Fig. 5).” And, in the legend to Figure 5B, “. . . (0.435 ± 0.039 nA/ms for +/+ vs. 0.429 ± 0.039 nA/ms for *stg*; *n* = 4; *p* > 0.05)” should have been, “. . . (0.435 ± 0.039 nA·ms for +/+ vs. 0.429 ± 0.039 nA·ms for *stg*; *n* = 4; *p* > 0.05).”

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 1121 14th St., NW, Suite 1010, Washington, DC 20005, phone 202-962-4000.

Instructions for Authors are available at <http://www.jneurosci.org/misc/itoa.shtml>. Authors should refer to these Instructions online for recent changes that are made periodically.

Brief Communications Instructions for Authors are available via Internet (http://www.jneurosci.org/misc/ifa_bc.shtml).

Submissions should be submitted online using the following url: <http://sfn.manuscriptcentral.com>. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-962-4000; fax, 202-962-4945; e-mail, jn@sfn.org.
