

# The Journal of Neuroscience

May 2, 2007 • Volume 27 Number 18 www.jneurosci.org

**Cover legend:** The series are single frames (left to right, top to bottom) from a movie capturing a “naive” acoustic startle response. A balloon was popped behind the subject’s head (top right corner in frames 3–5), who was unaware of what would happen, while recording the response at 1000 frames/s.

In humans, modulation of the acoustic startle response is impaired in various neuropsychiatric disorders, and in this issue, Burgess and Granato establish larval zebrafish as a genetic model to study prepulse inhibition of the startle response. For more information, see the article by Burgess and Granato in this issue (pages 4984–4994).

## i This Week in The Journal

### Brief Communications

- 4929 **Conversion of Functional Synapses into Silent Synapses in the Trigeminal Brainstem after Neonatal Peripheral Nerve Transection**  
Fu-Sun Lo and Reha S. Erzurumlu
- 4978 **PlexinA3 Restricts Spinal Exit Points and Branching of Trunk Motor Nerves in Embryonic Zebrafish**  
Julia Feldner, Michell M. Reimer, Jörn Schweitzer, Björn Wendik, Dirk Meyer, Thomas Becker, and Catherina G. Becker

### Articles

#### CELLULAR/MOLECULAR

- 4799 **Constitutive Ret Activity in Knock-In Multiple Endocrine Neoplasia Type B Mice Induces Profound Elevation of Brain Dopamine Concentration via Enhanced Synthesis and Increases the Number of TH-Positive Cells in the Substantia Nigra**  
Jelena Mijatovic, Mikko Airavaara, Anu Planken, Petri Auvinen, Atso Raasmaja, T. Petteri Piepponen, Frank Costantini, Liisa Ahtee, and Mart Saarma
- 4850 **The Neuropeptide Nociceptin Is a Synaptically Released Endogenous Inhibitor of Hippocampal Long-Term Potentiation**  
Saknan Bongsebandhu-phubhakdi and Toshiya Manabe
- 4859 **The Tyrosine Kinase Fyn Determines the Localization of TrkB Receptors in Lipid Rafts**  
Daniela B. Pereira and Moses V. Chao
- 4947 **Conditional NF-L Transgene Expression in Mice for *In Vivo* Analysis of Turnover and Transport Rate of Neurofilaments**  
Stéphanie Millecamps, Geneviève Gowing, Olga Corti, Jacques Mallet, and Jean-Pierre Julien
- 4969 **New Transmembrane AMPA Receptor Regulatory Protein Isoform,  $\gamma$ -7, Differentially Regulates AMPA Receptors**  
Akihiko S. Kato, Wei Zhou, Aaron D. Milstein, Mike D. Knierman, Edward R. Siuda, Joe E. Dotzlafl, Hong Yu, John E. Hale, Eric S. Nisenbaum, Roger A. Nicoll, and David S. Bredt

#### DEVELOPMENT/PLASTICITY/REPAIR

- 4894 **Antidepressant-Induced Neurogenesis in the Hippocampus of Adult Nonhuman Primates**  
Tarique D. Perera, Jeremy D. Coplan, Sarah H. Lisanby, Cecilia M. Lipira, Mohamed Arif, Cristina Carpio, Gila Spitzer, Luca Santarelli, Bruce Scharf, Rene Hen, Gorazd Rosoklija, Harold A. Sackeim, and Andrew J. Dwork

- 4902 **Lbx1 Acts as a Selector Gene in the Fate Determination of Somatosensory and Viscerosensory Relay Neurons in the Hindbrain**  
Martin A. Sieber, Robert Storm, Margaret Martinez-de-la-Torre, Thomas Müller, Hagen Wende, Katja Reuter, Elena Vasyutina, and Carmen Birchmeier

#### BEHAVIORAL/SYSTEMS/COGNITIVE

- 4810 **The Influence of Expected Value on Saccadic Preparation**  
David M. Milstein and Michael C. Dorris
- 4819 **Orbitofrontal Cortex Mediates Outcome Encoding in Pavlovian But Not Instrumental Conditioning**  
Sean B. Ostlund and Bernard W. Balleine
- 4826 **Differential Encoding of Losses and Gains in the Human Striatum**  
Ben Seymour, Nathaniel Daw, Peter Dayan, Tania Singer, and Ray Dolan
- 4839 **Developmental Differences in Posterior Mesofrontal Cortex Recruitment by Risky Rewards**  
James M. Bjork, Ashley R. Smith, Cinnamon L. Danube, and Daniel W. Hommer
- 4870 **Cannabinoids Excite Hypothalamic Melanin-Concentrating Hormone But Inhibit Hypocretin/Orexin Neurons: Implications for Cannabinoid Actions on Food Intake and Cognitive Arousal**  
Hao Huang, Claudio Acuna-Goycolea, Ying Li, H. M. Cheng, Karl Obrietan, and Anthony N. van den Pol
- 4882 **Spectrotemporal Receptive Fields in the Inferior Colliculus Revealing Selectivity for Spectral Motion in Conspecific Vocalizations**  
Sari Andoni, Na Li, and George D. Pollak
- 4910 **Serotonergic Modulation of Plasticity of the Auditory Cortex Elicited by Fear Conditioning**  
Weiqing Ji and Nobuo Suga
- 4935 **The Effect of Angioscotomas on Map Structure in Primary Visual Cortex**  
Clare E. Giacomantonio and Geoffrey J. Goodhill
- 4984 **Sensorimotor Gating in Larval Zebrafish**  
Harold A. Burgess and Michael Granato

#### NEUROBIOLOGY OF DISEASE

- 4832 **Catechol O-Methyltransferase val<sup>158</sup>met Genotype Influences Frontoparietal Activity during Planning in Patients with Parkinson's Disease**  
Caroline H. Williams-Gray, Adam Hampshire, Trevor W. Robbins, Adrian M. Owen, and Roger A. Barker
- 4919 **Atypical Gating Of M-Type Potassium Channels Conferred by Mutations in Uncharged Residues in the S<sub>4</sub> Region of KCNQ2 Causing Benign Familial Neonatal Convulsions**  
Maria Virginia Soldovieri, Maria Roberta Cilio, Francesco Miceli, Giulia Bellini, Emanuele Miraglia del Giudice, Pasqualina Castaldo, Ciria C. Hernandez, Mark S. Shapiro, Antonio Pascotto, Lucio Annunziato, and Maurizio Tagliatalata
- 4957 **Modulation of the Purinergic P2X<sub>7</sub> Receptor Attenuates Lipopolysaccharide-Mediated Microglial Activation and Neuronal Damage in Inflamed Brain**  
Hyun B. Choi, Jae K. Ryu, Seung U. Kim, and James G. McLarnon
- 4995 **Lesions Limited to the Human Thalamic Principal Somatosensory Nucleus (Ventral Caudal) Are Associated with Loss of Cold Sensations and Central Pain**  
Jong H. Kim, Joel D. Greenspan, Robert C. Coghill, Shinji Ohara, and Frederick A. Lenz

**5006** **Erratum:** In the article “A Circadian Clock in the Olfactory Bulb Controls Olfactory Responsivity” by Daniel Granados-Fuentes, Alan Tseng, and Erik D. Herzog, which appeared on pages 12219–12225 of the November 22, 2006 issue, the absolute values for the phase angle of entrainment (Table 1) were incorrect. The correct values are printed in this issue.

**Correction:** In the article “A Circadian Clock in the Olfactory Bulb Controls Olfactory Responsivity” by Daniel Granados-Fuentes, Alan Tseng, and Erik D. Herzog, which appeared on pages 12219–12225 of the November 22, 2006 issue, errors were made in describing the effects of olfactory bulbectomy on locomotor activity in mice. In the Abstract (page 12219), the seventh sentence should read “Furthermore, removal of the OB abolished spontaneous circadian cycling of c-Fos in the PC, lengthened the free-running period of locomotor rhythms, and slowed re-entrainment after a 6 h advance and accelerated re-entrainment after a 6 h delay in the light schedule.” In Results, the second paragraph under the section The OB modulates circadian rhythms regulated by the SCN (page 12221), the second and third sentences should read “OBX significantly increased the number of days needed to re-entrain to a 6 h advance in the LD cycle and significantly reduced the time needed to re-entrain to a 6 h delay (Table 1). Consistent with these changes in re-entrainment rates, OBX lengthened the free-running period of locomotor rhythms but did not change the phase angle of entrainment to a 12 h LD cycle.”

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 1121 14th St., NW, Suite 1010, Washington, DC 20005, phone 202-962-4000.

Instructions for Authors are available at <http://www.jneurosci.org/misc/itoa.shtml>. Authors should refer to these Instructions online for recent changes that are made periodically.

*Brief Communications* Instructions for Authors are available via Internet ([http://www.jneurosci.org/misc/ifa\\_bc.shtml](http://www.jneurosci.org/misc/ifa_bc.shtml)).

Submissions should be submitted online using the following url: <http://sfn.manuscriptcentral.com>. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-962-4000; fax, 202-962-4945; e-mail, [jn@sfn.org](mailto:jn@sfn.org).
