

The Journal of Neuroscience

October 1, 2008 • Volume 28 Number 40 www.jneurosci.org

Cover legend: Live confocal imaging of annexin-V-labeled sensory hair cells in a mouse cochlear culture.

The culture was treated with the aminoglycoside antibiotic neomycin, a drug that causes the rapid externalization of phosphatidylserine at the apical pole of the hair cell. For more information, see the article by Goodyear et al. in this issue (pages 9939–9952).
