November 5, 2008 • Volume 28 Number 45 www.jneurosci.org

**Cover legend:** Voxels indicating a significant increase in brainstem blood oxygenation-dependent activity during capsaicin-induced central sensitization are mapped onto a three-dimensional rendering of the whole brain (Montreal Neurological Institute, 152 template). The background is a montage of chili peppers from which capsaicin is derived. For more information, see the article by Lee et al. in this issue (pages 11642–11649).

Yun Ding, Aimin Qiao, Ziqing Wang, J. Shawn Goodwin, Eun-Sook Lee, Michelle L. Block, Matthew Allsbrook, Michael P. McDonald, and Guo-Huang Fan
- 11650 Inflammatory Response in the Hippocampus of PS1<sub>M146L</sub>/APP<sub>751SL</sub> Mouse Model of Alzheimer's Disease: Age-Dependent Switch in the Microglial Phenotype from Alternative to Classic**  
Sebastian Jimenez, David Baglietto-Vargas, Cristina Caballero, Ines Moreno-Gonzalez, Manuel Torres, Raquel Sanchez-Varo, Diego Ruano, Marisa Vizuete, Antonia Gutierrez, and Javier Vitorica
- 11662 Night Blindness and the Mechanism of Constitutive Signaling of Mutant G90D Rhodopsin**  
Alexander M. Dizhoor, Michael L. Woodruff, Elena V. Olshevskaya, Marianne C. Cilluffo, M. Carter Cornwall, Paul A. Sieving, and Gordon L. Fain
- 11741 *Erratum:*** In the article "Trafficking of Membrane-Associated Proteins to Cone Photoreceptor Outer Segments Requires the Chromophore 11- *cis*-Retinal" by Houbin Zhang, Jie Fan, Sha Li, Sukanya Karan, Baerbel Rohrer, Krzysztof Palczewski, Jeanne M. Frederick, Rosalie K. Crouch, and Wolfgang Baehr, which appeared on pages 4008–4014 of the April 9, 2008 issue, panels *J* and *L* of Figure 3 were identical. The correct Figure 3 is printed in this issue.

**Corrections:** For the article "Cannabinoid Receptors in the Bed Nucleus of the Stria Terminalis Control Cortical Excitation of Midbrain Dopamine Cells *In Vivo*" by Léma Massi, Izaskun Elezgarai, Nagore Puente, Leire Reguero, Pedro Grandes, Olivier J. Manzoni, and François

Georges, which appeared on pages 10496–10508 of the October 15, 2008, the authors acknowledge that a few sentences in the Discussion section included text that was inappropriately copied from a report by Melis M, Perra S, Muntoni AL, Pillolla G, Lutz B, Marsicano G, Di Marzo V, Gessa GL, Pistis M (2004) Prefrontal cortex stimulation induces 2-arachidonoyl-glycerol-mediated suppression of excitation in dopamine neurons. *J Neurosci* 24:10707–10715. This oversight does not affect the interpretations or conclusions. The authors further wish to acknowledge that Melis et al. (2004) were the first to describe a role for CB<sub>1</sub> receptors in controlling glutamateric afferents onto VTA DA neurons.

In the article “Pronounced Reduction of Digit Motor Responses Evoked from Macaque Ventral Premotor Cortex after Reversible Inactivation of the Primary Motor Cortex Hand Area” by Eric Schmidlin, Thomas Brochier, Marc A. Maier, Peter A. Kirkwood, and Roger N. Lemon, which appeared on pages 5772–5783 of the May 28, 2008 issue, there were two data errors in Materials and Methods section. On page 5773, under the section *Chronic investigation: use of sedative drug regimen*, the dose of Antisedan should have been 0.8 mg · kg<sup>-1</sup>. On page 5774, under *Muscimol inactivation*, the dose of muscimol should have been 2.5 μl.
