

The Journal of Neuroscience

November 18, 2009 • Volume 29 Number 46 • www.jneurosci.org

Cover legend: Confocal images showing immunostaining for the endogenous young neuronal marker doublecortin (green), and exploration-induced expression of the immediate-early gene *zif268* (red) in the hippocampus of a mouse. Hoechst counterstain is blue. For more information, see the article by Snyder et al. in this issue (pages 14484–14495).

i This Week in The Journal

Journal Club

- 14381 **Can Major Depression Improve the Perception of Visual Motion?**
Pascal Wallisch and Romesh D. Kumbhani

Brief Communications

- 14506 **Dissociating Response Conflict and Error Likelihood in Anterior Cingulate Cortex**
Nick Yeung and Sander Nieuwenhuis
- 14646 **Overexpression of the Wild-Type SPT1 Subunit Lowers Desoxysphingolipid Levels and Rescues the Phenotype of HSAN1**
Florian S. Eichler, Thorsten Hornemann, Alex McCampbell, Dika Kuljis, Anke Penno, Daniel Vardeh, Eric Tamrazian, Kevin Garofalo, Ho-Joon Lee, Lohit Kini, Martin Selig, Matthew Frosch, Ken Gable, Arnold von Eckardstein, Clifford J. Woolf, Guiman Guan, Jeffrey M. Harmon, Teresa M. Dunn, and Robert H. Brown, Jr
- 14681 **Endogenous Rhythms in *Period1* Mutant Suprachiasmatic Nuclei *In Vitro* Do Not Represent Circadian Behavior**
Julie S. Pendergast, Rio C. Friday, and Shin Yamazaki

Articles

CELLULAR/MOLECULAR

- 14408 **Schwann Cells Inhibit Ectopic Clustering of Axonal Sodium Channels**
Matthew G. Voas, Thomas D. Glenn, Alya R. Raphael, and William S. Talbot
- 14472 **Complementary Theta Resonance Filtering by Two Spatially Segregated Mechanisms in CA1 Hippocampal Pyramidal Neurons**
Hua Hu, Koen Vervaeke, Lyle J. Graham, and Johan F. Storm
- 14545 **SRI, a Mouse Odorant Receptor with an Unusually Broad Response Profile**
Xavier Grosmaître, Stefan H. Fuss, Anderson C. Lee, Kaylin A. Adipietro, Hiroaki Matsunami, Peter Mombaerts, and Minghong Ma
- 14581 **Neuronal Transporters Regulate Glutamate Clearance, NMDA Receptor Activation, and Synaptic Plasticity in the Hippocampus**
Annalisa Scimemi, Hua Tian, and Jeffrey S. Diamond
- 14652 **Novel Repression of *Kcc2* Transcription by REST-RE-1 Controls Developmental Switch in Neuronal Chloride**
Michele Yeo, Ken Berglund, George Augustine, and Wolfgang Liedtke

14663 ***In Vivo* Quantification of Myelin Changes in the Vertebrate Nervous System**
Yanming Wang, Chunying Wu, Andrew V. Capriarello, Eduardo Somoza, Wenxia Zhu, Changning Wang, and Robert H. Miller

14670 **Functional Heterogeneity at Dopamine Release Sites**
James A. Daniel, Sally Galbraith, Lorraine Iacovitti, Andrea Abdipranoto, and Bryce Visser

DEVELOPMENT/PLASTICITY/REPAIR

14394 **Telomere Shortening in Neural Stem Cells Disrupts Neuronal Differentiation and Neurogenesis**
Sacri R. Ferrón, M. Ángeles Marqués-Torrejón, Helena Mira, Ignacio Flores, Kerrie Taylor, María A. Blasco, and Isabel Fariñas

14484 **Adult-Born Hippocampal Neurons Are More Numerous, Faster Maturing, and More Involved in Behavior in Rats than in Mice**
Jason S. Snyder, Jessica S. Choe, Meredith A. Clifford, Sara I. Jeurling, Patrick Hurley, Ashly Brown, J. Frances Kamhi, and Heather A. Cameron

14571 **The Transition from Radial Glial to Intermediate Progenitor Cell Is Inhibited by FGF Signaling during Corticogenesis**
Wenfei Kang, Li Chin Wong, Song-Hai Shi, and Jean M. Hébert

BEHAVIORAL/SYSTEMS/COGNITIVE

14383 **Timing in the Absence of Supraspinal Input II: Regularly Spaced Stimulation Induces a Lasting Alteration in Spinal Function That Depends on the NMDA Receptor, BDNF Release, and Protein Synthesis**
Kyle M. Baumbauer, John R. Huie, Abbey J. Hughes, and James W. Grau

14423 **Orexin/Hypocretin and Histamine: Distinct Roles in the Control of Wakefulness Demonstrated Using Knock-Out Mouse Models**
Christelle Anaclet, Régis Parmentier, Koliane Ouk, Gérard Guidon, Colette Buda, Jean-Pierre Sastre, Hidéo Akaoka, Olga A. Sergeeva, Masashi Yanagisawa, Hiroshi Ohtsu, Patricia Franco, Helmut L. Haas, and Jian-Sheng Lin

14463 **Default Mode of Brain Activity Demonstrated by Positron Emission Tomography Imaging in Awake Monkeys: Higher Rest-Related than Working Memory-Related Activity in Medial Cortical Areas**
Takashi Kojima, Hirotaka Onoe, Kazuo Hikosaka, Ken-ichiro Tsutsui, Hideo Tsukada, and Masataka Watanabe

14496 **Investigating the Functional Heterogeneity of the Default Mode Network Using Coordinate-Based Meta-Analytic Modeling**
Angela R. Laird, Simon B. Eickhoff, Karl Li, Donald A. Robin, David C. Glahn, and Peter T. Fox

14511 **Caudate Nucleus Is Critically Involved in Trace Eyeblick Conditioning**
Luke C. Flores and John F. Disterhoft

14521 **Disruption of the Head Direction Cell Signal after Occlusion of the Semicircular Canals in the Freely Moving Chinchilla**
Gary M. Muir, Joel E. Brown, John P. Carey, Timo P. Hirvonen, Charles C. Della Santina, Lloyd B. Minor, and Jeffrey S. Taube

14553 **Correlations of Neuronal and Microvascular Densities in Murine Cortex Revealed by Direct Counting and Colocalization of Nuclei and Vessels**
Philbert S. Tsai, John P. Kaufhold, Pablo Blinder, Beth Friedman, Patrick J. Drew, Harvey J. Karten, Patrick D. Lyden, and David Kleinfeld

14596 **Reliable Recall of Spontaneous Activity Patterns in Cortical Networks**
Olivier Marre, Pierre Yger, Andrew P. Davison, and Yves Frégnac

- 14607 **A Comparative Magnetic Resonance Imaging Study of the Anatomy, Variability, and Asymmetry of Broca's Area in the Human and Chimpanzee Brain**
Simon S. Keller, Neil Roberts, and William Hopkins
- 14617 **How Humans Integrate the Prospects of Pain and Reward during Choice**
Deborah Talmi, Peter Dayan, Stefan J. Kiebel, Chris D. Frith, and Raymond J. Dolan
- 14627 **Regaining Motor Control in Musician's Dystonia by Restoring Sensorimotor Organization**
Karin Rosenkranz, Katherine Butler, Aaron Williamon, and John C. Rothwell
- 14637 **Disruption of the Ether-à-go-go K⁺ Channel Gene BEC1/KCNH3 Enhances Cognitive Function**
Akira Miyake, Shinji Takahashi, Yukihiro Nakamura, Kohei Inamura, Shun-ichiro Matsumoto, Shinobu Mochizuki, and Masao Katou

NEUROBIOLOGY OF DISEASE

- 14415 **T-Cell Infiltration and Signaling in the Adult Dorsal Spinal Cord Is a Major Contributor to Neuropathic Pain-Like Hypersensitivity**
Michael Costigan, Andrew Moss, Alban Latremoliere, Caroline Johnston, Monica Verma-Gandhu, Teri A. Herbert, Lee Barrett, Gary J. Brenner, Daniel Vardeh, Clifford J. Woolf, and Maria Fitzgerald
- 14439 **Divergent Pathways Mediate Spine Alterations and Cell Death Induced by Amyloid- β , Wild-Type Tau, and R406W Tau**
Christian Tackenberg and Roland Brandt
- 14451 **Amyloid Precursor Protein Mediates a Tyrosine Kinase-Dependent Activation Response in Endothelial Cells**
Susan A. Austin, Mary A. Sens, and Colin K. Combs
- 14534 **APP Anterograde Transport Requires Rab3A GTPase Activity for Assembly of the Transport Vesicle**
Anita Szodorai, Yung-Hui Kuan, Silke Hunzelmann, Ulrike Engel, Ayuko Sakane, Takuya Sasaki, Yoshimi Takai, Joachim Kirsch, Ulrike Müller, Konrad Beyreuther, Scott Brady, Gerardo Morfini, and Stefan Kins

Erratum: In the article "Best1 Is a Gene Regulated by Nerve Injury and Required for Ca²⁺-Activated Cl⁻ Current Expression in Axotomized Sensory Neurons" by Mathieu Boudes, Chamroen Sar, Aurélie Menigoz, Cécile Hilaire, Marie O. Péquignot, Alexei Kozlenkov, Alan Marmorstein, Patrick Carroll, Jean Valmier, and Frédérique Scamps, which appeared on pages 10063–10071 of the August 12, 2009 issue, there was an error. The illustrations of Best1 and Best3 gene expression by *in situ* hybridization (Fig. 1C and Fig. 4C) are erroneous because of the use of incorrect probes. These images and all discussion of them in the article should be disregarded. These data were mainly confirmatory of real-time PCR showing the increase in Best1 and Best3 transcripts and of electrophysiological experiments on cultured neurons showing the functional consequences of Best1 and Best3 on endogenous CaCC expressed in medium and large axotomized sensory neurons. As such, this error has no consequences for the main conclusions of the article.

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 1121 14th St., NW, Suite 1010, Washington, DC 20005, phone 202-962-4000.

Instructions for Authors are available at <http://www.jneurosci.org/misc/itoa.shtml>. Authors should refer to these Instructions online for recent changes that are made periodically.

Brief Communications Instructions for Authors are available via Internet (http://www.jneurosci.org/misc/ifa_bc.shtml).

Submissions should be submitted online using the following url: <http://jneurosci.msubmit.net>. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-962-4000; fax, 202-962-4945; e-mail, jn@sfn.org.
