

The Journal of Neuroscience

February 25, 2008 • Volume 29 Number 8 • www.jneurosci.org

Cover legend: Hindbrain of a 3-d-postfertilization transgenic zebrafish embryo in which motor neurons express *egfp* (green), and oligodendrocytes express *DsRed2* (red). Abducens motor neurons and commissural axons were labeled using Zn8 immunocytochemistry (blue). For more information, see the article by Zannino and Appel in this issue (pages 2322–2333).
