

## Erratum

In the March issue, in the article by S. R. J. Salton, C. Richter-Landsberg, L. A. Greene, and M. L. Shelanski (Nerve Growth Factor-inducible Large External (NILE) Glycoprotein: Studies of a Central and Peripheral Neuronal Marker. *Journal of Neuroscience* 3: 441–454, 1983), the sample data were inadvertently reversed in the legend to Figure 5, third sentence. The sentence should have read:

“ . . . Samples were loaded as follows: 43  $\mu\text{g}$  of total protein from untreated (*lane 1*) and NGF-treated (*lane 2*) cell extracts and 70  $\mu\text{g}$  of total protein from untreated (*lane 3*) and NGF-treated (*lane 4*) cell extracts.”

We regret any confusion that this error may have caused.
