

The Journal of Neuroscience

April 7, 2010 • Volume 30 Number 14 • www.jneurosci.org

Cover legend: Functional connectivity and networks in the infant brain. Spontaneous fluctuations in brain activity of neonates, 3-month-old infants, and 6-month-old infants were examined by using 94-channel near-infrared spectroscopy (NIRS). The temporal correlations of continuous signals between all the pairs of measurement channels revealed the functional connectivity of the cortical networks. The small, middle, and large circles represent the results of neonates, 3-month-old infants, and 6-month-old infants, respectively. The circles and white lines show the positions of measurement channels and connectivity (correlation coefficients > 0.5), respectively. The six clusters can be identified by coloring. The cortical network organization showed regional dependency and dynamic changes in the course of development. For more information, see the article by Homae et al. in this issue (pages 4877–4882).

Erratum: In the article “Deletion of GRK1 Causes Retina Degeneration through a Transducin-Independent Mechanism” by Jie Fan, Keisuke Sakurai, Ching-Kang Chen, Baerbel Rohrer, Bill X. Wu, King-Wai Yau, Vladimir Kefalov, and Rosalie K. Crouch, which appeared on pages 2496–2503 of the February 17, 2010 issue, there was a typographical error. The sentence “We found that following treatment with exogenous chromophore the sensitivity of the *Rpe65*^{-/-} *Grk1*^{-/-} rods was 2.5-fold lower than that of the *Rpe65*^{-/-} *Grk1*^{-/-} rods, consistent with the relative levels of opsin in the two lines.” in the second to last paragraph of Discussion was incorrect. The correct sentence should read “We found that following treatment with exogenous chromophore the sensitivity of the *Rpe65*^{-/-} *Grk1*^{-/-} rods was 2.5-fold lower than that of the *Rpe65*^{-/-} rods, consistent with the relative levels of opsin in the two lines.”

Persons interested in becoming members of the Society for Neuroscience should contact the Membership Department, Society for Neuroscience, 1121 14th St., NW, Suite 1010, Washington, DC 20005, phone 202-962-4000.

Instructions for Authors are available at <http://www.jneurosci.org/misc/itoa.shtml>. Authors should refer to these Instructions online for recent changes that are made periodically.

Brief Communications Instructions for Authors are available via Internet (http://www.jneurosci.org/misc/ifa_bc.shtml).

Submissions should be submitted online using the following url: <http://jneurosci.msubmit.net>. Please contact the Central Office, via phone, fax, or e-mail with any questions. Our contact information is as follows: phone, 202-962-4000; fax, 202-962-4945; e-mail, jn@sfn.org.
