

The Journal of Neuroscience

September 28, 2011 • Volume 31 Number 39 • www.jneurosci.org

Cover legend: Whole-mount immunohistochemistry staining of acetylcholinesterase, highlighting the myenteric ganglion and its fiber tracts in the ileum of an adult mutant mouse lacking homeodomain-interacting protein kinase 2. For more information, see the article by Chalazonitis et al. in this issue (pages 13746–13757).

14046 **Correction:** The article “Ablation of Cellular Prion Protein Does Not Ameliorate Abnormal Neural Network Activity or Cognitive Dysfunction in the J20 Line of Human Amyloid Precursor Protein Transgenic Mice,” by Moustapha Cissé, Pascal E. Sanchez, Daniel H. Kim, Kaitlyn Ho, Gui-Qiu Yu, and Lennart Mucke, originally appeared on pages 10427–10431 of the July 20, 2011 issue. A correction to that article appears on page 14046.

Correction: The article “The Representation of Visual and Motor Aspects of Reaching Movements in the Human Motor Cortex,” by Michal Eisenberg, Lior Shmuelof, Eilon Vaadia, and Ehud Zohary, originally appeared on pages 12377–12384 of the August 24, 2011 issue. A correction to that article appears on page 14046.

14047 **Retraction:** *The Journal of Neuroscience* has received a report describing an investigation by the Shanghai Institute of Biological Sciences, Chinese Academy of Sciences, which found major data misrepresentation in the article “*Lmx1b*-Controlled Isthmic Organizer Is Essential for Development of Midbrain Dopaminergic Neurons” by Chao Guo, Hai-Yan Qiu, Ming Shi, Ying Huang, Randy L. Johnson, Marcelo Rubinstein, Sheng-Di Chen, and Yu-Qiang Ding, which appeared on pages 14097–14106 of the December 24, 2008 issue. Because the results cannot be considered reliable, the *Journal* is retracting the paper.
