EXHIBIT AT THE

NEUROJOBS JOB FAIR

IN WASHINGTON, DC

NeuroJobs

SfN's ONLINE CAREER CENTER

Exhibit at the first-ever NeuroJobs Job Fair, expected to attract hundreds of job seekers at Neuroscience 2011. The event is free for all meeting attendees and will take place on Saturday, Nov. 12, 8:30 – 11 a.m. and 1 – 4 p.m.

Space is limited, so reserve your booth space now. Visit www.sfn.org/neurojobsfair2011 or contact awallace@sfn.org for more information.

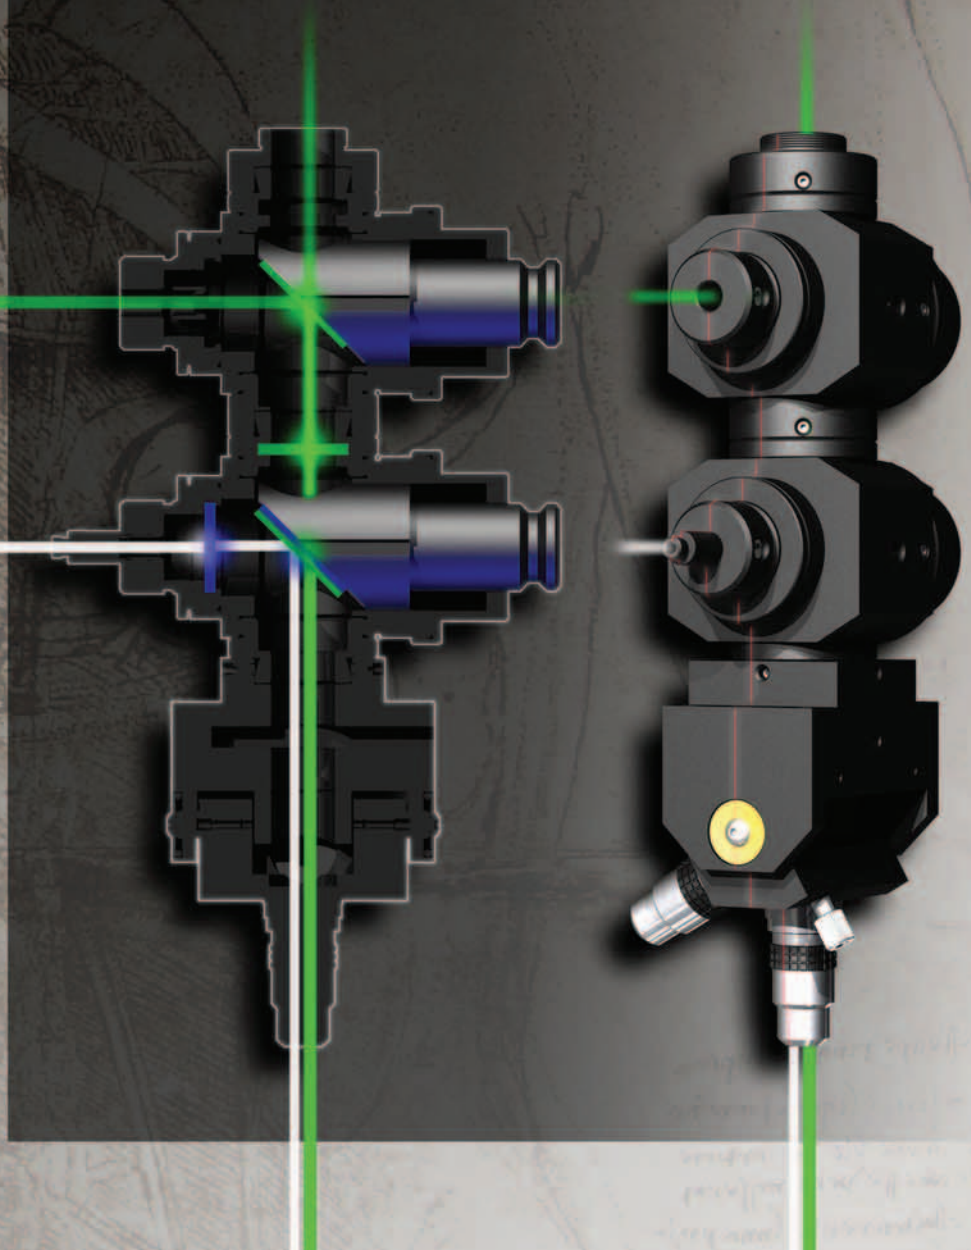

The Source...

for Laboratory Mechanicals / Life Sciences / Photonics

Siskiyou's CBH-1.0 beam-splitter module is ideal for creating your own standalone imaging system. The modular design allows stacking and linking of multiple units... add single color fluorescence... add another camera... stack another CBH-1.0 for secondary fluorescence. Single or double objective flipper mounts also available. The possibilities are only limited by your imagination.

CBH-1.0

bioengineering

Biovelocity.

Create Knockout Rats and Mice in as few as 5 months with Sigma's exclusive CompoZr® ZFN technology.

Utilize Sigma's SAGESpeed™ process to produce a custom knockout animal according to your specifications or make knockout animals in your own lab by using CompoZr ZFN reagents.

Create the knockout of your dreams with Sigma® Life Science.
