December 5, 2012 • Volume 32 Number 49 • www.jneurosci.org

Cover legend: Sagittal section of the developing cerebellum of a 10-day-old mouse. Anti-calbindin staining (green) highlights the dendritic trees of Purkinje cells, whereas anti-GFAP staining (red) labels Bergman glia. For more information, see the article by Haag et al. (pages 17842–17856).
