

The Journal of Neuroscience

April 3, 2013 • Volume 33 Number 14 • www.jneurosci.org

Cover legend: Fluorescent image of the dentate gyrus of triple mutant mice: *ArpC3^{fl/fl}; SlickV-CreER; Lox-stop-lox Rosa26 Tomato Fluorescent protein*. Image shows the mosaic distribution within the same tissue of wild-type neurons (green) and knock-out neurons (blue) after tamoxifen treatment. Nuclei are labeled with DAPI (red). Disruption of the Arp2/3 complex by loss of the ArpC3 subunit leads to progressive loss of dendritic spines over time *in vivo*, which is associated with schizophrenia-like endophenotypes. Cover design by Il Hwan Kim. For more information, see the article by Kim et al. (pages 6081–6092).
