

Correction

Correction: Subbanna et al., Anandamide–CB₁ Receptor Signaling Contributes to Postnatal Ethanol-Induced Neonatal Neurodegeneration, Adult Synaptic, and Memory Deficits

In the article “Anandamide–CB₁ Receptor Signaling Contributes to Postnatal Ethanol-Induced Neonatal Neurodegeneration, Adult Synaptic, and Memory Deficits” by Shivakumar Subbanna, Madhu Shivakumar, Delphine Psychoyos, Shan Xie, and Balopal S. Basavarajappa, which appeared on pages 6350–6366 of the April 10, 2013 issue, the authors regret an error in Figure 11. The error appears on the *y*-axis in which *B* should have started at 50 and *E* should have started at 0. Also, the graphs in *B* and *E* were accidentally flipped and the bar graph for *C* was accidentally removed and replaced with the graph shown in *F*. The interpretation and conclusions of the study are not affected. The correct Figure 11 is shown below.

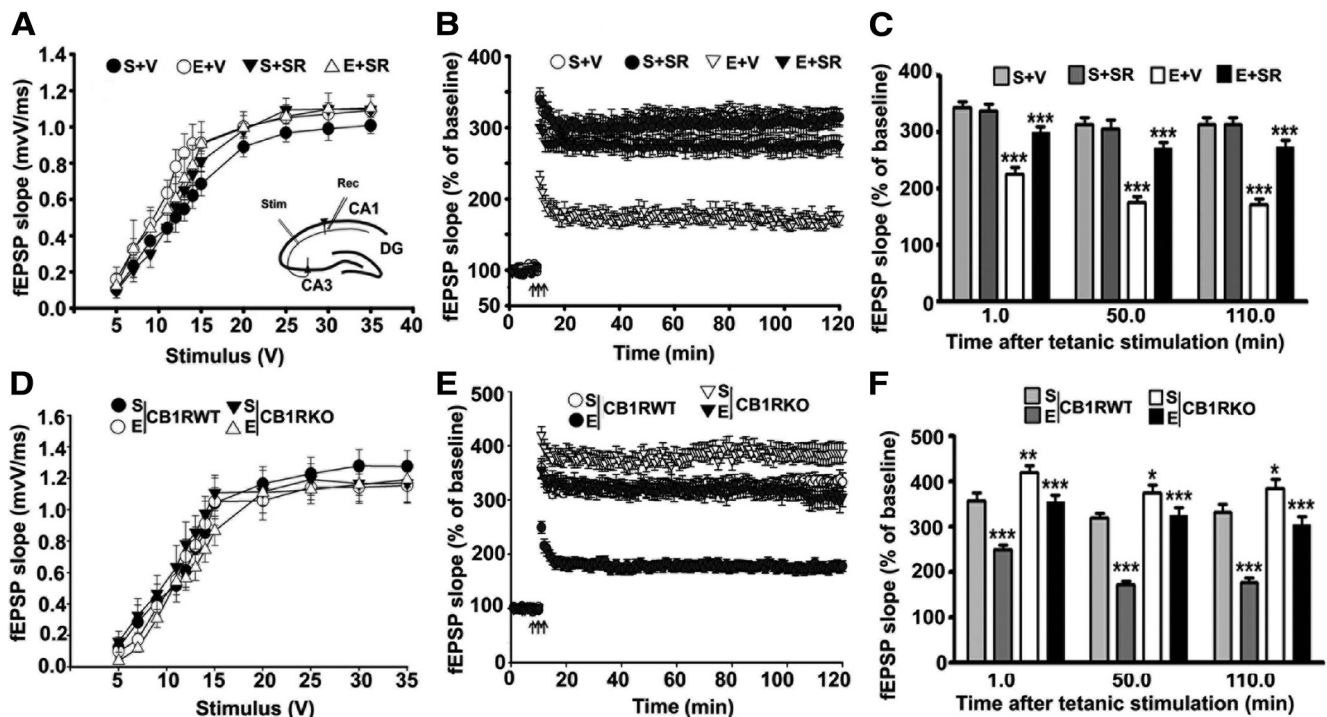

Figure 11.
