

The Journal of Neuroscience

September 4, 2013 • Volume 33 Number 36 • www.jneurosci.org

Cover legend: Confocal micrograph of motor cortical neurons (orange) that project to the auditory cortex in mice. The neurons were labeled by injecting a retrogradely transported virus encoding Cre into the auditory cortex of a mouse that expresses a fluorescent protein in a Cre-dependent manner. DAPI is in blue. For more information, see Nelson et al. (14342–14353).
