

The Journal of Neuroscience

April 9, 2014 • Volume 34 Number 15 • www.jneurosci.org

Cover legend: A CNS node in a teased myelinated fiber from the ventral funiculus of the spinal cord is shown immunostained for Nav channels at the node itself, Caspr at the paranode, and Kv.1.1 channels in the juxtaparanode. For more information, see the article by Desmazieres et al. (pages 5083–5088).
