

The Journal of Neuroscience

May 14, 2014 • Volume 34 Number 20 • www.jneurosci.org

Cover legend: 3D-SIM projection image of *Drosophila* third-instar larval neuromuscular junction. The microtubule-associated protein Futsch is labeled in magenta and the active zone protein Bruchpilot is labeled in green. The high-resolution microscopy used here enables visualization of the doughnut shape of Bruchpilot staining. For more information, see the article by Lepicard et al. (pages 6759–6771).
